

INTEGRATED M. TECH BIOTECHNOLOGY

SEMESTER VI

Detailed Syllabus
Lecture-wise Breakup

Course Code	19B12HS611	Semester: EVEN	Semester: VI	Session: 2022-23
Course Name	Econometric Analysis			
Credits	3	Contact Hours	2-1-0	

Faculty (Names)	Coordinator(s)	Manas Ranjan Behera
	Teacher(s) (Alphabetically)	Manas Ranjan Behera

COURSE OUTCOMES		COGNITIVE LEVELS
C304-2.1	<i>Demonstrate</i> the key concepts from basic statistics to understand the properties of a set of data.	Understanding Level -C2
C304-2.2	<i>Apply</i> Ordinary Least Square method to undertake econometric studies.	Apply Level - C3
C304-2.3	<i>Examine</i> whether the residuals from an OLS regression are well-behaved.	Analyze Level - C4
C304-2.4	<i>Evaluate</i> different model selection criteria for forecasting.	Evaluation Level - C5
C304-2.5	<i>Create</i> models for prediction from a given set of data.	Creation Level - C6

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Statistical Inference	Point and interval estimation; The Z distribution; The Null and Alternate hypotheses; The chi-square distribution; The F distribution; The t distribution	3
2.	Regression Analysis	Two variable regression model; The concept of the PRF; Classical assumptions of regression; Derivation of the OLS estimators and their variance; Properties of OLS estimators under classical assumptions; Gauss-Markov Theorem; Tests of Hypothesis, confidence intervals for OLS estimators; Measures of goodness of fit: R square and its limitations; Adjusted R square and its limitations	7
3.	Econometric Model Specification	Identification: Structural and reduced form; Omitted Variables and Bias; Misspecification and Ramsay RESET; Specification test; Endogeneity and Bias	5
4.	Failure of Classical Assumptions	Multi-collinearity and its implications; Auto-correlation: Consequences and Durbin-Watson test; Heteroskedasticity: Consequences and the Goldfeld -Quandt test	2
5.	Forecasting	Forecasting with a) moving averages b) linear trend c) exponential trend CAGR; Forecasting with linear regression; Classical time series	5

		decomposition; Measures of forecast performance: Mean square error and root mean square error; Limitations of econometric forecasts	
6.	Time Series Analysis	Univariate Time Series Models: Lag Operator, ARMA , ARIMA models, Autoregressive Distributed Lag Relationship	3
7.	Linear Programming	Linear programming; Dual of a linear programming problem; Simplex method Transportation	3
Total number of Lectures			28

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25 (Quiz+Project+Viva -Voce)
Total	100

Project based Learning: Students have to form a group (maximum 5 students in each group) and have to do an econometric analysis on the topic assigned. Students will use the different statistical methods using quantitative data to develop theories or test existing hypothesis. Students will also be encouraged to forecast future economic trends.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Gujarati, D.N. (2002), Basic Econometric (4 th ed.), New York: McGraw Hill.
2.	Greene, W.H. (2003), Econometric Analysis, New Jersey: Prentice Hall.
3.	Madala, G.S. (1992), Introduction to Econometrics (2 nd ed.), New York: Macmillan.
4.	Wooldridge,J (2010),Econometric Analysis of Cross Section and Panel Data(2nd ed.), Cambridge, The MIT Press.
5.	Stock, J. H., and M. W. Watson. (2015). Introduction to Econometrics, (Third Update), Global Edition. Pearson Education Limited.

Detailed Syllabus
Lecture-wise Breakup

Course Code	18B12MA611	Semester Even	Semester VI Session 2022-23
Course Name	Operations Research		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Dr. Pato Kumari	
	Teacher(s) (Alphabetically)	Dr. Mohd. Sarfaraz, Dr. Amita Bhagat	
COURSE OUTCOMES			COGNITIVE LEVELS
After pursuing the above-mentioned course, the students will be able to:			
C302-3.1	construct mathematical models for optimization problems and solve linear programming problems (LPP) using graphical and simplex method.	Applying Level (C3)	
C302-3.2	apply two-phase, Big-M and dual simplex method for linear programming problems.	Applying Level (C3)	
C302-3.3	make use of sensitivity analysis to linear programming problems.	Applying Level (C3)	
C302-3.4	solve transportation, assignment and travelling salesman problems.	Applying Level (C3)	
C302-3.5	apply cutting plane and branch & bound techniques to integer programming problems.	Applying Level (C3)	
C302-3.6	examine optimality conditions and solve multivariable nonlinear problems.	Analyzing Level (C4)	
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Preliminaries	Introduction, Operations Research Models, Phases and Scope of O.R. Studies.	3
2.	Linear Programming Problems (LPP)	Convex Sets, Formulation of LPP, Graphical Solutions, Simplex Method, Big-M Method, Two Phase Method, Special Cases in Simplex Method.	8
3.	Duality and Sensitivity Analysis	Primal-Dual Relationship, Duality, Dual Simplex Method, Sensitivity Analysis.	8
4.	Transportation Problems	Introduction, Matrix Form, Applications, Basic Feasible Solution-North West Corner Rule, Least Cost Method, Vogel's Approximation Method. Degeneracy, Resolution on Degeneracy, Optimal Solution, Maximization TP Model.	5
5.	Assignment Problems	Definition, Hungarian Method, Traveling Salesmen Problems.	4
6.	Integer Linear Programming Problems	Pure and Mixed Integer Linear Programming Problems, Cutting Plane Method, Branch and Bound Method.	6
7.	Non-Linear Programming	Introduction to NLP, convex functions and graphical solution, Unconstrained Problem, Constrained Problems - Lagrange Method for equality	8

		constraints, Kuhn-Tucker Conditions for inequality constraints, Quadratic Programming -Wolfe's Method	
Total number of Lectures			42
Evaluation Criteria			
Components	Maximum Marks		
T1	20		
T2	20		
End Semester Examination	35		
TA	25 (Quiz, Assignments, Tutorials)		
Total	100		
Project based learning: Each student in a group of 4-5 will collect literature on transportation, assignment and integer programming problem to solve some practical problems. To make the subject application based, the students analyze the optimized way to deal with afore mentioned topics.			
Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)			
1.	Taha, H. A. - Operations Research - An Introduction, Pearson Education, 2011.		
2.	Hadley, G. - Linear Programming, Massachusetts: Addison-Wesley, 1962.		
3.	Hiller, F.S. and Lieberman, G. J. - Introduction to Operations Research, San Francisco, 1995.		
4.	Wagner, H. M. - Principles of Operations Research with Applications to Managerial Decision, PHI, 1975.		
5.	Vohra, N. D., Quantitative Techniques in Management, Second Edition, TMH, 2003.		

Detailed Syllabus
Lecture-wise Breakup

Course Code	15B11BT611	Semester Even	Semester VI	Session 2022-23
Course Name	Comparative & Functional Genomics			
Credits	4	Contact Hours	4	
Faculty	Coordinator(s)	1. Prof. Vibha Rani		
(Names)	Teacher(s) (Alphabetically)	1. Dr. Chakresh Kumar Jain		
COURSE OUTCOMES				COGNITIVE LEVELS
CO1	Explain the fundamental concepts of functional genomics, transcriptomics and proteomics			Understand (C2)
CO2	Apply advanced techniques for improved diagnostics and therapeutics			Apply (C3)
CO3	Categorize different bioinformatics tools related to genomics and proteomics			Apply (C3)
CO4	Integrate and infer the bioinformatics data obtained through genomics studies			Analyze (C4)
Pre-requisite [10B11BT511]- Introduction to Bioinformatics				
Module No.	Subtitle of the Module	Topics in the module		No. of Lectures for the module
1.	Genes and Genomes	Basics structure of gene and organization in prokaryotic to eukaryotic, features of genome structure and complexity, evolutionary conservation, type of model organism, their structure number of genes sequencing status, type of maps genetic linkage maps, physical maps, techniques used to map their significance relation with human genome		3
2.	Whole Genome Sequencing Technologies	Human genome project factsheet, techniques used for sequencing (shot gun sequencing), mapping techniques (BAC, YAC), genome assembly problems		2

3.	Genome Annotation i.e. Mining Genomic Sequence Data	Sequential annotation, structural annotations, prediction of gene and their elements like ORF finder, promoter region, LDA method, functional genomics, Dijkstra's algorithm, application in functional correlation	3
4.	Haplotyping: Concepts and Applications	Basics of haplotyping and its application in disease	2
5.	Pharmacogenomics: Concepts and Applications in Healthcare	Basics of phylogenomic, methods used and application, Basics of pharmacogenomics and relation with disease, personalized medicine	4
6.	SNP Technologies: Platforms & Analysis	SNP structure, techniques, prevalence and application in population genetics	3
7.	Gene Silencing Mechanisms	RNAi, noncoding RNAs, Structure and biogenesis difference between SiRNA, MiRNAs, protein involve in RISC, prediction rule set, CRISPER	3
8.	Gene Cloning and Expression Platforms	Introduction: Gateway technology; Microarrays; SAGE; GIS	3
9.	DNA Protein Interactions	General; CHIP assay, EMSA; Library screening; DNA foot-printing; south western analysis; one hybrid assay	5
10.	Phage display	introduction; peptide display; antibody display; phage and phagemid system	4
11.	Protein-protein Interactions	Ribosome display; tandem affinity purification; Yeast two hybrid system, GST pull Down	4
12.	Quantitative proteomics	MALDI-TOF; LC-MS-MS, ICAT method; 2-D technology; Biomarkers; protein arrays	6
Total number of Lectures			42

Evaluation Criteria

Components Maximum Marks

T1 20

T2 20

End Semester Examination 35

TA 25 (Assignment-1&2, Home Assignment, Quiz and case studies)

Total 100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	A. M. Lesk. <i>Introduction to Genomics</i> . United Kingdom (UK): Oxford University Press, 2007.
2.	T.A. Brown. <i>Genomes-3</i> . United Kingdom (UK): Oxford University Press, 2007.
3.	D. C. Liebler and J. R. Yates. <i>Introduction to Proteomics</i> . New York, USA: Humana Press, 2002.
4.	Protein-Protein Interactions, Methods and Applications, Editors: Meyerkord, Cheryl L., Fu, Haiian (Eds.), 2015
5.	N. C. Jones and P. A. Pevzner. <i>Introduction to Bioinformatics Algorithms (Computational Molecular Biology)</i> . Massachusetts, USA: MIT Press, 2004.
6.	DNA-Protein Interactions, Principles and Protocols, Editors: Leblanc, Benoît P., Rodrigue, Sebastien (Eds.), 2015

Project based learning: Each student was given insights to understand the concepts of drug discovery using genomics, transcriptomics and proteomics tools. To make subject application based, the students were given case studies of COVID-19 to understand and analyze latest applications of the CFG concepts. At the end of the course, students were asked to design their own hypothesis and proposal in the improvement of existing diagnostics and therapeutics against human pathologies.

Detailed Syllabus
Lecture-wise Breakup

Course Code	15B17BT671	Semester: EVEN	Semester VI Session: 2022-23
Course Name	Comparative and Functional Genomics Lab		
Credits	1	Contact Hours	3
Faculty (Names)	Coordinator(s)	Prof. Vibha Rani	
	Teacher(s) (Alphabetically)	Dr. Chakresh Jain, Dr. Sonam Chawla, Prof. Sudha Srivastava Prof. Sujata Mohanty	
COURSE OUTCOMES			COGNITIVE LEVELS
C374.1	Explain the basic concept of genes and genome using various databases		Understand Level (C2)
C374.2	Compare and analyze functional genomic and proteomic data using computational tools		Analyze Level (C4)
C374.3	Utilize the acquired knowledge of gene expression technologies		Analyze Level (C3)
C374.4	Apply and analyze cloning and expression of gene of interest		Analyze Level (C4)

Module No.	Title of the Module	List of Experiments	CO
1-4	Basic skills of transcriptomics	RNAase free water preparation and DEPC treatment of labware	CO2
		RNA isolation from plant tissues	CO2
		Quality assessment of isolated RNA	CO4
		Primer designing for quantitative RT-PCR	CO2
5-9	Basic skills of proteomics	Induction and expression of recombinant proteins	CO2
		SDS-PAGE analysis of differential expression of recombinant proteins	CO4
		SDS-PAGE analysis of differential	CO4
		Gel densitometry using ImageJ	CO4
		Western blotting for expressed protein confirmation	CO2
10-12	Analysis of molecular interactions	To interpret the protein- protein interaction using STRING	CO 3
		Visualization of molecular interaction network and identification of crucial gene(s) using Cytoscape	CO 1
		Identification of clusters/Modules in a network	CO3

Evaluation Criteria

Components	Maximum Marks
Mid Term Exam	20
End Term Exam	20
Day to Day	60
Total	100

Project Based Learning: Students are given independent/group project based computational experiments on analysing protein-protein interactions, or identification of crucial genes, and hubs and nodes in networks of various diseases.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	Keith Wilson, John Walker. —Principles and Techniques of Practical Biochemistry. Cambridge University Press, 2000
2.	https://vlab.amrita.edu/?sub=3&brch=187&sim=1331&cnt=1 (Western blotting) https://vlab.amrita.edu/?sub=3&brch=186&sim=718&cnt=1 (RNA isolation) https://www.youtube.com/watch?v=OWcMYWaYYIU (RNA isolation)
3	http://vlab.amrita.edu/index.php?sub=3&brch=273&sim=1501&cnt=1 (Primer designing)
4	http://vlab.amrita.edu/?sub=3&brch=186&sim=319&cnt=1 (Polyacrylamide gel electrophoresis) https://vlab.amrita.edu/index.php?sub=3&brch=276&sim=1483&cnt=1 (Integrating Biological Networks and Microarray Expression data)
5	Design of experiments, principle and the expected outcome and related literature will be provided to the student

Detailed Syllabus
Lecture-wise Breakup

Course Code	19B13BT311	Semester: Even	Semester: VI	Session: 2022-23
Course Name	Nanoscience in Food Technology			
Credits	2	Contact Hours	2	
Faculty (Names)	Coordinator(s)	Prof. Sudha Srivastava		
	Teacher(s) (Alphabetically)	Prof. Sudha Srivastava		
COURSE OUTCOMES			COGNITIVE LEVELS	
CO1	Explain properties of nanoparticles and nanoemulsions		Understand Level (C2)	
CO2	Outline food processing, packaging and preservation		Understand Level (C2)	
CO3	Apply nanotechnology concepts to improve food quality, texture, and shelf life		Apply Level (C3)	
CO4	Analyze food quality degradation and pathogens detection, using nanosensors		Analyze Level (C4)	
Module No.	Title of the Module	Topics in the Module		No. of Lectures for the module
1.	Introduction to Nanomaterials	Introduction to nanomaterials, nanoemulsions, method of synthesis and identification of nanoemulsions		5
2.	Food Packaging and Preservation	Introduction to food processing, packaging and preservation. Modified atmosphere packaging, active packaging and intelligent packaging.		6
3.	Application of nanotechnology in Food and agriculture	Microemulsions for delivery of nutraceuticals, edible films and coating for food, Polymer nanocomposites, effect of nanomaterials on mechanical, thermal and barrier properties of polymers. Application of nanotechnology for pesticide delivery, nutrient uptake etc. Nanomaterials in Food-Health and Safety Issues		7
4.	Biosensors for monitoring food quality	Time temperature indicators, pathogen detection using biosensors, Pesticide detection using biosensor.		6
Total number of Lectures				24
Evaluation Criteria				
Components		Maximum Marks		
Mid Term		30		
End Term		40		
TA		30 (Presentation, Class Test)		
Total		100		

PBL: Students will choose any application of nanotechnology in food science and give a report/presentation in a group or individually. If possible they can visit some food industry and write a report on that.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

Detailed Syllabus
Lecture-wise Breakup

Subject Code	15B19BT691	Semester : Even	Semester : VI Session : 2022-23
Subject Name	Minor 2		
Credits	4	Contact Hours	
Faculty (Names)	Coordinator(s)	1. Dr. Rachana	
	Teacher(s) (Alphabetically)		

COURSE OUTCOMES		Cognitive level
C351.1	Outline the specific biotechnological problem and explain the related scientific approaches	C2
C351.2	Summarize the literature related to the specified topic	C2
C351.3	Analyze and demonstrate team effort in presentation and data analysis	C4
C351.4	Organize the data and develop scientific report writing skills	C3
<p>PBL based learning: Minor project is methodically designed for the students so that they can learn to do literature review with a rationale behind, could identify a problem identification and formulate with a planning, to implicate to solve it in a methodological way and present in the form of power point presentations along with a report submission.</p>		

Detailed Syllabus
Lecture-wise Breakup

Course Code	16B1NBT633	Semester Even	Semester: VI Session: 2022-23
Course Name	Instrumentation Techniques in Biotechnology		
Credits	4	Contact Hours	4
Faculty (Names)	Coordinator(s)	Dr. Priyadarshini	
	Teacher(s) (Alphabetically)	Dr. Priyadarshini	
COURSE OUTCOMES			COGNITIVE LEVELS
CO1	Explain the principles, practices and instrumentation		Apply Level (C2)
CO2	Apply understanding of the principles, practices and instrumentation		Apply Level (C3)
CO3	Compare and contrast techniques of different instruments for their strength, limitations and creative use for problem-solving.		Apply Level (C4)
CO4	Assess sample preparation method(s) and problem solving		Apply Level (C4)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Basic laboratory Instruments	Background of instrumentation, Principle, working and applications of centrifugation, pH meter and other basic instruments	5
2.	Microscopy techniques	Principle, working and applications of simple microscope, electron microscopy (SEM & TEM), confocal, fluorescence and phase contrast microscopy.	7
3.	Spectroscopy techniques	Principle, working and applications of UV, Visible, IR, NMR, Fluorescence, circular dichroism, Atomic Absorption spectroscopy, Surface plasmon resonance, Nuclear magnetic resonance, X-ray diffraction.	7
4.	Mass spectrometry techniques	a) Introduction to Ionisation, Mass analysers, Detectors b) Structural information by tandem mass spectrometry c) Analysing protein complexes d) Computing and database analysis	7
5.	Radioisotopic techniques	a) Principles & application of radioisotope b) The nature of radioactivity c) Detection and measurement of radioactivity	6

		d) Other practical aspects of counting of radioactivity and analysis of data e) Safety aspects	
6.	Flow cytometry	a) Principles of the Flow Cytometer b) Principles of Fluorescence c) Data Analysis d) Controls in Flow Cytometry e) Optimizing your Experiments	5
7.	Live imaging techniques.	a) Issues of maintaining cell viability during imaging b) Types of techniques and microscopy used for live-cell imaging c) Applications of Live Cell Imaging	5
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Assignment 1, Assignment2)	
Total		100	
Project based learning: Each student in a group of 5-6 will select a instrument which are being used in biotechnology research area and will explain about the principle and working methodology of it. They will also be asked to take the recent research paper and explain the instrument used in that particular research. This will help them to select a instrument for a particular experiment.			
Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)			
1.	I. D. Campbell, Biological spectroscopy (Benjamin/Cummings Pub. Co, Menlo Park, Calif, 1984), Biophysical techniques series		
2.	K. Wilson, J. M. Walker, Eds., Principles and techniques of biochemistry and molecular biology (Cambridge University Press, Cambridge, UK: New York, 7th ed., 2009).		
3.	D. B. Williams, C. B. Carter, Transmission electron microscopy a textbook for materials science (Springer, New York, 2009; http://dx.doi.org/10.1007/978-0-387-76501-3).		
4.	R. M. Silverstein, Spectrometric identification of organic compounds (John Wiley & Sons, Hoboken, NJ, 7th ed., 2005)

Detailed Syllabus
Lecture-wise Breakup

Course Code	16B1NBT634 ELECTIVE	Semester EVEN	Semester VI	Session 2022-23
Course Name	Genetic Disorder and Personalized Medicine			
Credits	4	Contact Hours	4	
Faculty (Names)	Coordinator(s)	Dr. Sujata Mohanty		
	Teacher(s) (Alphabetically)	Dr. Sujata Mohanty		
COURSE OUTCOMES				COGNITIVE LEVELS
C330-1.1	Apply knowledge of genetic principles to understand disease etiology, clinical features and mode of inheritance			Apply Level (C3)
C330-1.2	Explain and interpret different molecular diagnoses and genetic test results			Understand Level (C2)
C330-1.3	Analyze the role of population and quantitative genetics for genetic disorders			Analyze Level (C4)
C330-1.4	Develop the concept of Personalized Medicine and integrate information from HGP databases			Apply Level (C3)
C330-1.5	Assess the genetic counseling process and its impact from a cultural, ethical and psychosocial perspective			Evaluate Level (C5)
Module No.	Title of the Module	Topics in the Module		No. of Lectures for the module
1.	Introduction to Genetic Disorder and Principles of their Inheritance	Introduction to Medical Genetics, Genetic Disorder and Concern, Clinical Features, Genetic Principles to Understand Disease Etiology, and Mode of Inheritance, Pedigree analysis and carrier screening		08
2.	Genetic Screening and DNA Banking	Preventive Genetics; DNA Banking and Clinical DNA Testing, Cytogenetic, Molecular and Biochemical Common as well as Modern Technology based Genetic Tests and their Results Interpretation		08
3.	Population and Quantitative Genetics	Application of population genetics in genetic risk calculation within Family/Population, heritability factor estimation		06

4.	Case studies	Case studies; Epigenetics, Uniparental disomy, Mosaicism, Inborn errors of metabolism, cancer genetics etc.,	06												
5.	Human Genome Projects	Human Genome Projects and Outcomes: Initial Reference Genome, 100,000, Encode, Gencode and the future prospects, Integration of genomic information in Biomedical Sciences, Related Databases	06												
6.	Concept of Personalized Medicine	Personalized Medicine, Study of Genetic resources (OMIM, Gene tests, Gene clinics etc.)	04												
7.	Genetic counseling	The Genetic Counseling Process and Its Impact from a Cultural, Ethical and Psychosocial Perspective	04												
Total number of Lectures			42												
<p>PBL: Students after learning the modes of inheritance, will do small projects on various case studies with regards to appropriate genetics screening, carrier screening, % of transmission risk and also will make the family pedigree chart. In addition, students will do projects on comparative genomics using the available genomic information of biomarkers associated with genetic disorders and can understand the concept of Personalized Medicine. Human Genome projects on rare genetic disorders will provide students to explore more on population or lineage specific genetic diseases.</p>

7.	Current research articles relevant to this subject will be provided as study materials and discussed in the class.

Detailed Syllabus
Lecture-wise Breakup

Course Code	21B13BT311	Semester: Even	Semester: VI	Session 2022-23
Course Name	Biorisk and Biosecurity			
Credits	Value Added Course	Contact Hours (per week)	2	
Faculty (Names)	Coordinator(s)	Ashwani Mathur		
	Teacher(s) (Alphabetically)	Dr. Ashwani Mathur		
COURSE OUTCOMES				COGNITIVE LEVELS
CO1	Compare and classify the potential Biorisk agents			Understand Level (C2)
CO2	Identify various hazards associated with biological agents			Apply Level (C3)
CO3	Explain the importance of biosafety and biosecurity in laboratories and industries			Understand Level (C2)
CO4	Examine Biosafety measures and Biosecurity surveillance			Analyze Level (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction to Biorisk	Introduction to risk associated with biological materials, potential hazardous organisms and samples. Understand biological agent and associated biohazards	6
2.	Hazard identification	Human microbiota, pathogen and virulence factors, zoonotic agents of research animals, Hazards of plant pathogen, pathogens to human health, laboratory associated infections, nosocomial infections	6
3.	Risk assessment of biological Hazards	Assessment of the risks associated with hazardous agents- bacterial pathogens, viral, mycotic agents and biological toxins, molecular agents,	6
4.	Introduction to Biosafety and Biosecurity	Understanding biosafety, Safety in laboratories, biosafety in large scale production, Biosafety in pharmaceutical industry, biosafety guidelines for different containment level, Bioterrorism and Bioaccident, Introduction to biosecurity	6
	Elements of Biosecurity	Primary barriers and equipment for biosecurity, Biosecurity Surveillance strategies, Biosecurity surveillance in food and agriculture sector	6
Total number of Lectures			30

Evaluation Criteria	
Components	Maximum Marks
Mid Term Examination	30
End Semester Examination	40
TA	30 (Assignments / Quiz / Reports/ Class Test)
Total	100

Project based Learning: The students will learn about potential biorisk associated with biological material, along with risk analysis approach. The knowledge of elements of security and safety measures associated with the risks, will help students being an intellectual resource for Institutions and organizations dealing with biological agents and organisms their working with them following good laboratory practices. The students will be submitting the assignment where potential risk situation (case studies) will be discussed with them and they will be advised to explore a solution in context to risk and plan a safety and security strategy.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Dawn P. Wooley, Karen B. Byers, Biological Safety: Principles and Practices- 3 rd Edition, Wiley Publishers, 2020 [ISBN: 9781555819637]

Lecture-wise Breakup

Course Code	15B17BT474	Semester Even	Semester: VI Session 2023 -2024
Course Name	Immunology Lab		
Credits	1	Contact Hours	2
Faculty (Names)	Coordinator(s)	Dr Sonam Chawla	
	Teacher(s) (Alphabetically)	Ms. Manisha Singh, Prof Rachna, Prof. Sudha Srivastava,	
COURSE OUTCOMES			COGNITIVE LEVELS
C276.1	Understand and learn skills for purification of antibody for experimental procedures.		C2
C276.2	Demonstrate relationship between different antigens using basic immunological techniques.		C2
C276.3	Apply immunological techniques for quantifying antigen/ antibody in the given sample.		C3
C276.4	Apply basic knowledge and skills of immunological principles and techniques for diagnostic assays.		C3
Module No.	Title of the Module	List of Experiments	CO
1.	Purification of antibody	Ammonium sulphate precipitation of crude immunoglobulins from serum.	C276.1
2.	Purification of antibody	Desalting of crude precipitated immunoglobulin by dialysis.	C276.1
3.	Purification of antibody	Chromatographic separation of immunoglobulin using DEAE-cellulose columns.	C276.1
4.	Purification of Antibody	Quantification of amount of immunoglobulin at different steps of its purification.	C276.1
5.	Quantification of antigen/ antibody concentration	Quantification of antibody concentration using Precipitin assay.	C276.3

6.	Quantification of antigen/ antibody concentration	Quantification of antibody concentration using Single Radial Immuno Assay (SRID)/Mancini's test.	C276.3
7.	Demonstrate relationship between different antigens	Demonstrating relationship among the antigens using Ouchterlony Double Diffusion Assay (ODD).	C276.2
8.	Demonstrate relationship between different antigens	Analysing antigens from their complex mixture (serum) using Immunoelectrophoresis.	C276.2
9.	Principles of diagnostic assays	Demonstrate the presence of antigen in the given sample by using latex agglutination assay.	C276.4
10.	Principles of diagnostic assays	Detecting presence of antigen using DOT-BLOT ELISA, the basic principle behind pregnancy and other diagnostic kits.	C276.4
11.	Principles of diagnostic assays	Demonstrating pregnancy kit.the principle and functioning	C276.4
12.	Principles of diagnostic assays	Determining the presence and concentration of antibody/antigen in the sample using ELISA, the basic technique behind various diagnostic tests.	C276.4

PBL: The experiments for this course are designed in a way that the students will learn from the scratch to purify the antibodies from crude serum and will learn to use them for different applications such as detecting and identifying antigens in unknown samples. Students also learn latest techniques like ELISA which are used diagnosing pregnancy and HIV etc.

Evaluation Criteria

Components	Maximum Marks
Lab Record	15
Performance based test	15
Mid term viva voce	20
End term viva voce	20
Day to day evaluation	20
Attendance	10
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	J.A Owen, J.Punt, S. A. Stanford, P. P Jones, Janus Kuby Immunology (7 th edition), W.H. Freeman and company, 2009
2.	Harlow and D.Lane, Edward A. Greenfield Ed, Antibodies: A laboratory Manual, 2 nd edition Old spring Harbor Laboratory, 2014

Detailed Syllabus
Lecture-wise Breakup

Semester & Session	VI 2022-23	Credits	4	Contact Hours	4
				L T P	4 - -
Course Name				Antimicrobial Resistance (16B1NBT632)	
Credits		3		Contact Hours	3
Faculty (Names)	Coordinator(s)		Vibha Gupta		
	Teacher(s) (Alphabetically)		1. Vibha Gupta		
COURSE OUTCOMES				COGNITIVE LEVELS	
S. No.	Course Outcomes				Cognitive levels
C331-1.1	Explain the importance of antimicrobials and emerging resistance				C2
C331-1.2	Describe the biological mechanisms of antibiotic resistance				C2
C331-1.3	Analyze antimicrobial susceptibility tests				C4
C331-1.4	Support Antibiotic stewardship				C5
Module No.	Subtitle of the Module	Topics in the module			No. of Lectures for the module
1.	Course overview	Basic overview of antibiotic resistance; Importance of optimizing antimicrobial usage for maintaining cost-effective therapies			2
2.	Antimicrobial Classes	Discovery and History of antibiotics, importance of antibiotics, Different classes of antimicrobials (bacterial, Viral & fungal) and their mode of action			6
3.	Mechanisms of Resistance	Molecular mechanisms of Resistance; Emergence and spread of resistance; Microbial resistance – a global issue			6
4.	Techniques for detection of resistance	Antimicrobial susceptibility tests; methods for detecting antimicrobial resistance; Obtaining good results; interpretation of antimicrobial susceptibility results; genomic analysis tools to detect resistance genes			10
5.	New antimicrobial approaches	Alternative therapies to antibiotics – phage therapy, probiotics, vaccines, etc.			7
6.	Antimicrobial Stewardship	Roles and responsibilities of different stakeholders in antimicrobial stewardship (including physician, pharmacist, microbiologist, hospital administrators); Case studies - Antimicrobial stewardship strategies by WHO, ICMR etc.			10

Total number of Contact hours		41
Evaluation Criteria		
Components	Maximum marks	
T1	20	
T2	20	
End term	35	
TA	25	
Total	100	
<p>Project based Learning: Students in groups of 4 to 5 will be engaged in a project - Awareness Program Against Antimicrobial Resistance (APAAR) under which they (i) will collect and analyze data on Antibiotic knowledge and usage by all so as to be able to analyze the present AMR scenario in India and (ii) will carry out a survey to understand current prescription behavior of doctors (iii) will try to understand the cost involved in treatment of drug resistant versus drug sensitive infection taking examples of commonly prevalent diseases such as TB, Typhoid, Pneumonia etc</p>		
<p>Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)</p>		
1.	Kateryna Kon and Mahendra Rai “Antibiotic Resistance: Mechanisms and New Antimicrobial Approaches” Academic press 2016	
2.	CARD - Comprehensive Antibiotic Resistance Database (https://card.mcmaster.ca/) site for information on publicly available resistance genes and related information.	
3.	Research papers and Reports provided as per the course content.	

Detailed Syllabus
Lecture-wise Breakup

Course Code	19B12HS612	Semester: Even	Semester VI	Session 2022-23
Course Name	Social Media and Society			
Credits	3	Contact Hours	2-1-0	
Faculty (Names)	Coordinator(s)	Dr. Shirin Alavi		
	Teacher(s) (Alphabetically)	Dr. Shirin Alavi		
COURSE OUTCOMES			COGNITIVE LEVELS	
C304-1.1	Infer the implications of digital change, and the concept of social media and e-marketing in the context of the changing marketing landscape		Apply Level(C3)	
C304-1.2	Elaborate the implications of cyber branding and digitization on online marketing mix decisions		Create Level (C6)	
C304-1.3	Develop specific models related to social media and social media analytics		Create Level (C6)	
C304-1.4	Evaluate concepts related to Search Engine Marketing, Customer Centric Web Business models and Web Chain Analysis		Evaluate Level(C5)	
C304-1.5	Illustrate the new age marketing practices		Understand Level (C2)	
Module No.	Title of the Module	Topics in the Module		No. of Lectures for the module
1.	Introduction, Individuals Online and Rules for engagement for social media	What is social media marketing, the importance of social media for influencing target audience, Patterns of internet usage, Internet user demographics, The Behavioural Internet, E-Marketing, The Virtual world, the changing Marketing Landscape, E - Marketing-Strengths and Applications, Online Marketing Domains, Digital Marketing Optimization, The Need for Digital Engagement		4
2.	The Online Marketing Mix	The Online Marketing Mix, Consumer Segmentation, Consumer Traits, Consumers and Online Shopping Issues, E-Product, E-Place, E-Price, E-Promotion, Website Characteristics affecting online purchase decision.		3

3.	The Online Consumer and Social Media	The Digital Ecosystem, Online Consumer Behavior, Cultural Implications of key web characteristics, Models of website visits, Web 2.0 and Marketing, The collaborative web, Network evolution, Network science, Marketing with networks, Metcalfe's law, Netnography, Social Media Model by McKinsey, Social Media Tools-Blogs, Wikis, Online Communities, Facebook, Twitter, You Tube, Flickr, Microblogging.	4
4.	Online Branding and Traffic Building	Cyber branding, Online brand presence and enhancement, The Digital Brand Ecosystem, Brand Experience, Brand Customer Centricity, Brands and Emotions, The Diamond Water paradox, Internet Traffic Plan, Search Marketing Methods, Internet Cookies and Traffic Building, Traffic Volume and quality, Traffic Building Goals, Search Engine Marketing, Keyword Advertising, Keyword value, Internet Marketing Metrics, Websites and Internet Marketing.	4
5.	Web Business Models, Social Media Strategy, Social Media Marketing Plan	The value of a Customer Contact, Customer Centric Business Management, Web Chain of Events, Customer Value Analysis and the Internet, Business Models, Revenue Benefits, Value Uncertainty, Purchase Importance, Define a social media plan, explain the social Media marketing planning cycle, list the 8C's of strategy development.	4
6.	Market Influence analytics in a Digital Ecosystem	Engagement Marketing through Content Management, Online Campaign Management, Consumer Segmentation, Targeting, and Positioning using Online Tools, Market Influence Analytics in a Digital Ecosystem, The Digital Ecosystem, Knowledge as a value proposition, CGM and Consumer behavior, The value of the power of influence, Amplifying Social Media Campaigns.	4
7.	The Contemporary Digital Revolution and its impact on society	Online Communities and Co-creation, The fundamentals of online community management strategies, The World of Facebook, The Future of Social media Marketing—Gamification and Apps, Game based marketing The world of Apps, Apps and the Indian Diaspora	3
8.	Integrating Mobile into Social Media Marketing	Types of Mobile Marketing, Progression of the mobile as a Marketing channel, some Indian mobile marketing campaigns, Impact of Social Media on government, the economy, development, and education	2
Total number of Lectures			28

Project Based Learning: The project is to be done in a group size of 4 -5 members. Students were asked to identify one brand/company on social media. Read the information available on social media and browse through campaigns. Study the consumer engagement and comments. Write their opinion about it. Analyze the same with a social media tool and compare the results. Also identify and elucidate the strategies used by the brand in the context of online branding. This helped the students to understand concepts of cyber branding and social media analytics and enhanced their employability skills in an organization.

Evaluation Criteria

3.	F. Halliday, "Terrorism in Historical Perspective"., <i>Open Democracy</i> . 22 April, 2004 [Online] Available: http://www.opendemocracy.net/conflict/article_1865.jsp
4.	J. Baylis and S. Smith, Ed. <i>The Globalization of World Politics: An Introduction to International Relations</i> . Oxford, UK: Oxford University Press, 2017

5.	L.Gordon and S. Halperin, “Effective Resistance to Corporate Globalization” in <i>Contesting Global Governance</i> , R.O’Brien, A.M. Goetz, J.C. Scholte & M.Williams. Cambridge, UK: Cambridge University Press,2000
----	---

Project Based learning: Each student would form a group of 3-4 students and to make projects on issues such as climate change, terrorism and proliferation of nuclear weapons. This project would help the students in having a better idea about the contemporary global issues and how with the revolution in information and technology as a result of globalization has impacted the world. This would improve their research skills and enhance their knowledge about the impact of globalization on various sectors of the economy.

Course Code	21B12HS311	Semester: EVEN	Semester: VI Session:2022-23
Course Name	Development Issues and Rural Engineering		
Credits	03	Contact Hours	2-1-0
Faculty (Names)	Coordinator(s)	Dr. Amandeep Kaur	
	Teacher(s) (Alphabetically)	Dr. Amandeep Kaur (amandeep.kaur@mail.jiit.ac.in)	
COURSE OUTCOMES			COGNITIVE LEVELS
C304-10.1	Understand the concept, philosophy and determinants of rural development		Understanding Level-(C2)
C304-10.2	Assess public policies related to rural development		Analyze Level – (C4)
C304-10.3	Explain the role of local self-governance in planning and development of rural areas.		Understanding Level-(C2)
C304-10.4	Analyze the impact of recent policy changes and schemes on rural development.		Analyze Level – (C4)
C304-10.5	Evaluate the issue and challenges of through possible determinants of rural development.		Evaluation Level-(C5)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Rural Development: An Introduction	Rural Development Philosophy, Concepts, Principles, Traditional and Modern Concept of Development, Trends and Pattern of micro as well as macro indicators of Rural Development.	4
2.	Public Policies and Rural Development	Policies related to Employment Generation, Poverty Reduction, Skill Development and, Infrastructure such as MGNREGA, DDUGKY, Atam Nirbhar Bharat rojgar yojna and schemes related to MSMEs etc.	6

3.	Rural Development Administration and Panchayat Raj Institutions	Rural Development administration: Panchayat Raj System (73 rd Amendment Act), functions of Panchayat Raj System, Financial Distribution of Resources in Rural India through Panchayat Raj System, merits and demerits of Panchayat system, Ways to strengthen the existing system by overcoming the flaws.	6
4.	Rural Development Issues and Challenges	Issues and challenges of Rural development: Employment in line with sectoral distribution (GDP and Employment), Poverty and Migration Issue, Rural and Urban Consumption and Production Linkages.	7
5.	Recent Advancements and changes	Recent packages and schemes implemented in Rural India, Budget Allocation for Rural Development - 2019-20 and 2020-21: For Employment Generation, poverty reduction, infrastructure and MSMEs.	5

<p>Project-based Learning: Students are required to collect the data related to different indicators of rural development (related to agriculture, health and education infrastructure, literacy levels, population density, poverty, employment etc.). They also need to check the compatibility of data (data mining and data refining process) and then analyse the contribution of these indicators in rural development of particular state/country as whole. Moreover, they are required to analyse the extent of progress and failure of programmes/schemes implemented in rural areas for poverty reduction, employment generation and MSMEs. Collecting information and analysing the data related to development indicators and policies will upgrade students' knowledge regarding the development issues and strengthen their skills to tackle multiple data handling and measuring issues.</p>

Course Code	15B11BT414	Semester Even	Semester: VI Session: 2022-23
Course Name	Immunology		
Credits	4	Contact Hours	6
Faculty (Names)	Coordinator(s)	Prof. Rachana	
	Teacher(s) (Alphabetically)	Dr Rachna, Dr Shalini Mani	
COURSE OUTCOMES			COGNITIVE LEVELS
CO216.1	Differentiate between innate & adaptive immunity and explain the role of cells as well organs of immune system.		Understand level (C2)
CO216.2	Compare different antigens, immunogens, antibodies as well as their interactions and regulations		Understand level(C2)
CO216.3	Identify the inappropriate immune response in autoimmunity, hypersensitivity, immunodeficiency and infectious disease.		Apply level (C3)
CO216.4	Analyze different techniques based on antigen-antibody interactions and their use in diagnostics and therapeutics.		Analyze level (C4)
CO216.5	Apply the concepts of immunology in vaccine designing and production of monoclonal antibodies		Apply level (C3)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Basic immunology	Historical perspectives, Cells and organs of the immune system	3
2.	Types of immunity	innate and acquired immunity	3
3.	Antigens	Immunogenicity, antigenicity, epitopes, haptens, mitogens	2
4.	Immunoglobins : structure and function	Basic structure and fine structure of Igs, immunoglobulin classes, hybridoma technology, antibody engineering	4

5.	Antigen- antibody interactions	Theory, cross reactivity, precipitation reactions, agglutination reactions, RIA, ELISA, Western blotting, immunofluorescence	4
6.	B cell and T cell receptor	Organization and expression of immunoglobulin genes : Generation of antibody diversity, class switching, T cell receptor complex, TCR coupled signaling pathways, co-stimulatory signals	5
7.	Major histocompatibility complex (MHC) and HLA	General organization and inheritance of MHC, structure of MHC class I and II molecules, peptide binding by MHC molecules, MHC and susceptibility to disease, Tissue and organ transplantation	3
8	Regulation of immune response and immunological tolerance	Cytosolic and endocytic pathway, Responses in humoral and cell mediated branch and immunological tolerance	2
9	Immune effector mechanisms	Complement system, Cytokines	3
10	Autoimmunity	Types of autoimmune diseases	2
11	Hypersensitivity reactions	Type I, II, III and IV, hypersensitivity reactions	2
12	Vaccines	Types, active and passive immunization	3
13	Immune response to infectious diseases and tumor immunity	Viral, bacterial, protozoan diseases, parasitic infections	4
14	Immunodeficiency diseases	Primary and secondary immunodeficiency diseases, Acquired immunodeficiency syndrome (AIDS)	2
Total number of Lectures			42

PBL: Students will be asked to search and identify relevant topics in the area of Immunology and the topics will be taken up in groups of 3 – 4 students and will be discussed/presented in the class. This will train students to search the database and take decision to choose and explore application based topics and share/present with their peers

Mid Semester Examination		30	
End Semester Examination		40	
TA		30 (Attendance-10, Assignments/ Class Test/ Quiz/ LAB Record -05, Project -15)	
Total		100	
Project based learning: In this subject student will learn the latest front-end technology. After completing the subject, each student in a group of 3-4 will be able to create a mobile application.			
Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)			
Reference Books:			
1.	Schildt, H. (2014). Java: The Complete Reference. McGraw-Hill Education Group.		
2.	Mughal, K. A., & Rasmussen, R. W. (2016). A Programmer's Guide to Java SE 8 Oracle Certified Associate (OCA). Addison-Wesley Professional.		
3.	Gaddis, T., Bhattacharjee, A. K., & Mukherjee, S. (2015). Starting out with Java: early objects. Pearson.		
Text Books:			
4.	Duckett, J. (2014). Web Design with HTML, CSS, JavaScript and jQuery Set. Wiley Publishing.		
5.	Shenoy, A., & Sossou, U. (2014). Learning Bootstrap. Packt Publishing Ltd.		
6.	Lee, W. M. (2012). Beginning android for application Development. John Wiley & Sons.		
7.	Hardy, B., & Phillips, B. (2013). Android Programming: The Big Nerd Ranch Guide. Addison-Wesley Professional.		

Detailed Syllabus
Lecture-wise Breakup

Course Code	16B1NHS 531	Semester: Even	Semester : VI Session: 2022-23
Course Name	Sociology of Youth		
Credits	3	Contact Hours	(3-0-0)
Faculty (Names)	Coordinator(s)	Prof Alka Sharma	
	Teacher(s) (Alphabetically)	Prof Alka Sharma Shikha Kumari	
COURSE OUTCOMES			COGNITIVE LEVELS
C304-13.1	Demonstrate an understanding of Youth and youth culture in sociological perspectives		Understanding (C 2)
C304-13.2	Explain the ethical, cultural& social issues concerning Youth		Evaluating (C5)
C304-13.3	Examine the relative importance of structure and agency in shaping young people's experiences and life opportunities		Analyzing (C4)
C304-13.4	Evaluate youth experience in a context of social change		Evaluating (C5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction to Youth	Meaning and characteristics of youth, demographic profile of youth in India, Challenges faced by Youth, Youth's roles and responsibilities in society	4
2.	Youth Culture	Concept of Youth Culture, role of Popular culture in shaping youth culture,	4
3.	Perspectives on Youth Culture	Functionalist, Conflict, Interactionist and Feminist Perspective on Youth Culture, Youth and Gender	5
4.	Youth and Identity	Social divisions: sexuality, urban and rural youth, social identities: subcultural, digital, Experiences of youth to negotiate identities in contemporary societies	8
5.	Socialization of Youth	Concept and process of socialization, Internalization of norms, types of socialization, conditions of learning, internalized objects, theories of socialization, stages of socialization, adult socialization, agents of socialization, role of culture in socialization, socialization and cultural differences, importance of socialization, Failure of the socialization process	9
6.	Problems of Youth	Role and Value conflicts, Generation Gap, Career decisions and Unemployment, Emotional adjustment, Coping with	8

		pressures of living, Unequal Gender norms, Crime (Social Strain theories),	
7.	Changing perceptive of Youth and Youth Culture in 21 st century	involvement of youth in major decision making institutions, Post-modernity and Youth, Youth Unrest	4
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20 (Project based)	
T2		20	
End Semester Examination		35	
TA		25 (Presentation, Assignment, attendance, Quiz and Participation in Tutorial)	
Total		100	

PBL- Each student will identify the variables shaping their identity and aspirations. In what ways do they do this? (Another way to think about this question: How do these social forces or institution provide you with the chance to pursue your goals? How do they limit your life chances?)

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Tyyskä, V. <i>Youth and Society: The long and winding road</i> , 2nd Ed., Canadian Scholars' Press, Inc. (2008).
2.	White, Rob, Johanna Wyn and Patrizia Albanese. <i>Youth & Society: Exploring the Social Dynamics of Youth Experience</i> . Don Mills, ON: Oxford University Press, 2011.
3.	Bansal, P. <i>Youth in contemporary India: Images of identity and social change</i> . Springer Science & Business Media, 2012.
4.	Furlong, Andy. <i>Youth studies: An introduction</i> . Routledge, 2012.
5.	Blossfeld, Hans-Peter, et al., eds. <i>Globalization, uncertainty and youth in society: The losers in a globalizing world</i> . Routledge, 2006.
6.	Ruhela, Satya Pal, ed. <i>Sociology of the teaching profession in India</i> . National Council of Educational Research and Training, 1970.
7.	Frith, S. "The sociology of youth. Themes and perspectives in sociology." Ormskirk, Lancashire: Causeway Books , 1984.

Lecture-wise Breakup

Course Code	20B16CS322	Semester: Even	Semester VI	Session 2023 -2024
Course Name	Java Programming			
Credits	Audit	Contact Hours	[1- 0 - 2]	
Faculty (Names)	Coordinator(s)	Mr. Janardan Kumar Verma , Shariq Murtuza		
	Teacher(s) (Alphabetically)			
COURSE OUTCOMES At the completion of the course, Students will be able to				COGNITIVE LEVELS
C305-8.1	Write basic Java programs using Java constructs – loops, switch-case and arrays.			Understand Level (C2)
C305-8.2	Define all basic concepts related to OOP concepts			Remember Level (C1)
C305-8.3	Develop java programs using Java collection framework			Apply Level (C3)
C305-8.4	Create or design an application based on Java programming constructs			Create Level (C6)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Overview of OOA (Object Oriented Analysis) and Java basics	Classes, Objects, OOPs concept using JAVA, Packages and Interfaces.	3
2.	JVM Internals	Memory management, Garbage Collection	1
3.	String Handling	Using String and StringBuilder class. String Immutability(toString())	2
4.	Exception Handling in JAVA	Fundamentals, Exception types, Java built-in exceptions, Custom Exceptions, Chained Exceptions.	2
5.	Collections Framework	Collection Overview, List, Map (hashCode& Equals), Set, Queue & other collections	4
6.	Multithreading in Java	Multithreading overview and requirement, Thread state diagram, Java multithreading implementation (Thread/Runnable), Challenges in multithreading/Mutual Exclusion, Java handling of mutual exclusion (synchronization), Communication between threads (wait/notify)	2
Total number of Lectures			14

Evaluation Criteria Components	Maximum Marks

End Semester Examination	40
TA PBL mode = 08.)	30 (Attendance = 07, Quizzes = 08, Internal assessment = 07, Assignments in

Total	100

Project based learning: Assignments on different topics are given to each student. They utilize the java concepts and try to solve different problems given as assignments.

The course emphasized on the Skill development of students in Java Programming. Topics like inheritance, classes, exception handling, multithreading, collection frameworks, etc. are taught to enhance the programming skills of the students for making them ready for employability in software development companies.

Recommended Reading material:	
Text Books	
1.	Schildt, H. (2014). <i>Java: the complete reference</i> . McGraw-Hill Education Group.
2.	Bloch, J. (2016). <i>Effective java</i> . Pearson Education India.
Referenc Books	
1.	Sierra, K., & Bates, B. (2005). <i>Head First Java: A Brain-Friendly Guide</i> . " O'Reilly Media, Inc."
2.	Mughal, K. A., & Rasmussen, R. W. (2003). <i>A programmer's guide to Java certification: a comprehensive primer</i> . Addison-Wesley Professional.

Detailed Syllabus
Lecture-wise Breakup

Course Code	21B12MA311	Semester - Even	Semester: VI Session: 2022-23
Course Name	Mathematical Modelling in Biotechnology		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Dr. Yogesh Gupta	
	Teacher(s) (Alphabetically)	Dr. Yogesh Gupta	
COURSE OUTCOMES			COGNITIVE LEVELS
After pursuing the above mentioned course, the students will be able to:			
C302-12.1	explain basic concepts of mathematical modelling in Biotechnology.		Understanding Level (C2)
C302-12.2	apply difference equations in mathematical modelling.		Applying Level (C3)
C302-12.3	make use of ordinary differential equations in mathematical modelling.		Applying Level (C3)
C302-12.4	construct and solve mathematical models using system of differential equations.		Applying Level (C3)
C302-12.5	apply partial differential equations and numerical methods to solve various models.		Applying Level (C3)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction to Mathematical Modelling	Classification of mathematical models. Procedure, merits and challenges of mathematical modelling. Applications of algebra, geometry, calculus etc. in mathematical modelling.	6
2.	Mathematical Modelling through Difference Equations	Basic theory and methods for difference equations, Homogeneous and non-homogeneous difference equations, Difference equations in discrete models of population dynamics and genetics, Discrete Prey-Predator models.	8
3.	Mathematical Modelling through Ordinary Differential Equations	Formation of differential equations, Methods of ordinary differential equations, First order and higher order ODEs, Eigen values and eigen vectors, Stability and bifurcation, Applications in continuous models such as Growth models, Decay models, Newton's Law of Cooling, Population dynamics, Continuous Prey-Predator models and other models.	11
4.	Applications of System of Differential Equations	Methods for system of simultaneous ordinary differential equations, Applications in Mathematical models of infectious diseases, The Kermack-McKendrick model, Epidemic models- SI, SIR, SIRS, SIRD etc.	8
5.	Applications of Partial Differential	Basic concepts, methods and applications of partial differential equations, Numerical methods in modelling,	9

	Equations and Numerical Methods in Mathematical Modelling	Euler method, Runge-Kutta method, some applications in Biotechnological processes.	
Total number of Lectures			42
