

Detailed
Syllabus

Course Code	15B17CI373	Semester ODD (specify Odd/Even)	Semester 5th	Session 2024-2025
Course Name	Computer Organization and Architecture Lab			
Credits	1	Contact Hours	2	

Faculty (Names)	Coordinator(s)	Pawan Kumar Upadhyay (62), Prakhar Mishra (128)
	Teacher(s) (Alphabetically)	Amarjeet Kaur, Anuja Arora, Hema N, Jyoti Chauhan, Naveen Chauhan, Pawan Kumar Upadhyay, Pankaj Mishra, Prakhar Mishra, Rashmi Kushwha, Sailesh Kumar, Sayani, Taj Alam

COURSE OUTCOMES		COGNITIVE LEVELS
C377.1	Realizing basic 2-bit and 4-bit ALU using hardwired simulation tool	Understand (Level 2)
C377.2	Initialization and fetching of data from specific memory using various addressing mode of 8085	Understand (Level 2)
C377.3	Experiments to use the software interrupts and various assembler directives for 8085 programming.	Apply (Level 3)
C377.4	Demonstrate to use the software interrupts and various assembler directives for MIPS programming.	Apply (Level 3)
C377.5	Design of a basic systems using RISC/CISC architecture based processor and to develop applications using microprocessor or microcontrollers.	Create (Level 6)

Module No.	Title of the Module	List of Experiments	CO
1.	COA Hardwired simulation tool	Realize the truth table of various gates like as AND, OR, NOT, XOR, NAND and NOR., Conversion of universal gates, Design the half adder and full adder circuits, Ripple	C377.1

		adder logic circuit, 4 x1 multiplexor circuit and realize the various input output logic based on control, 4X1 multiplexor with NAND gates logic circuits	
2.	Combinational circuits	Design the subtractor circuits with defined bit logic, Adder-subtractor logic circuits, The odd frequency divider circuits, Carry lookup adder, Carry select and carry save, Adder circuits by modifying the ripple carry adder logic given in module-1.,Timing diagram of all four adder circuits and compare their performance, Decoder circuits with defined logic, 4-bit ALU circuits with defined operation logic.	C377.1
3.	8085 Simulator Introduction	Understanding Hardware Specification of the 8085 Simulator in detail, Add two 8-bit numbers from load sample program from file menu, assemble and execute it step by step and view the contents of registers and memory., Basic Data transfer instructions, Arithmetic instructions, Logical instruction of 8085 using sample programs withnote changes in flags.	C377.2
4.	8085 Programming (Simple)	8085 Assembly Programming: Basic Arithmetic (like addition, subtraction, multiplication, division etc), Array (sum , reverse, average copy etc) etc and explore more about Arithmetic , Logical and Flow control Instructions	C377.2
5.	8085 Programming (Complex)	8085 Assembly Programming: Logical and Data transfer (like Min, Max, Even/odd, Sorting etc), more complex program(like Factorial, Link list etc) , String etc and explore more about Arithmetic, Logical and Flow control Instructions	C377.2
6.	MIPS(MARS) Simulator (Simple)	MIPS Assembly Programming: Arithmetic (like addition, subtraction, multiplication, division etc), Logical and Data transfer (like Min, Max, Even/odd, Sorting etc), Array (sum , reverse, average copy etc)	C377.3
7.	MIPS(MARS) Simulator (Complex)	Complex program (Factorial, Fibonacci etc), String Operations, Translation of C control statement into MIPS(IF THEN ELSE,WHILE, FOR LOOP, SWITCH control,)and explore more about Arithmetic, Logical, Flow control Instructions using MARS Simulator.	C377.4
8.	Projects	Students are expected to create an hardware and software co-designed application based on 8085/ 8086/ MIPS/ Other controller (like Arduino) / Small Size computer (like Raspberry Pi)programming either in assembly or high level language.	C377.5

Project based learning: Project in COA lab is an integral part of the lab. Student form group size 3-4, and discuss the project idea with their lab faculty before finalizing. All projects are based on hardware and hardware components like microprocessor microcontrollers (like Arduino), microcomputer (like Raspberry pi), various sensors (like temperature sensor, humidity sensor etc), cams (like webcam), etc. are used. Programming language is used as per processor/controller. Students develop projects/prototypes to interact with physical environment, control physical object with software which is base of IoT and embedded system. Students learn various processor architecture as well as their programming languages. This helps students to understand how to develop IoT based products and embedded systems.

Evaluation Criteria	
Components	Maximum Marks
Evaluation 1	10
Lab Test 1	20
Evaluation 2	10
Lab Test 2	20
Project	25
Attendance	15
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
Text Book	
1.	David A. Patterson, John L. Hennessy, Computer Organization and Design –The Hardware/Software Interface, Morgan Kaufman, Fifth edition, 2013. ISBN: 9780124078864
2.	M. Morris Mano, Computer System Architecture, Prentice Hall of India Pvt Ltd, Fourth edition, 2002. ISBN: 81-203-0855-7.
3.	Ramesh Gaonkar, Microprocessor Architecture Programming and Applications with the 8085 [HB]-6/e. 25, September 2014.
Reference Book	
1.	John L. Hennessy and David A Patterson, Computer Architecture A quantitative Approach, Morgan Kaufmann / Elsevier, Sixth Edition, 2017
2.	Nicholas Carter, Schaum’s outline of Computer Architecture, Tata McGraw Hill, 2017

Detailed Syllabus

Lab-wise Breakup

Subject Code	15B17CI472	Semester ODD	Semester V Session 2024-2025 Month: July-Dec 2024
Subject Name	Operating System and System Programming Lab		NBA Code: C275
Credits	0-0-1	Contact Hours	2

Faculty (Names)	Coordinator(s)	Alka Singhal (Sec-62) , Ashish kumar(Sec-128)
	Teacher(s) (Alphabetically)	Alka Singhal, Ankita Jaiswal, Ashish Mishra, Deepika, Kashav Ajmera, Parmeet Kaur, Prashant Kaushik, Vikash, Vivek Kumar Singh Ambalika Sarkar, Ashish Kumar, Gaurav Kumar Nigam

COURSE OUTCOMES	COGNITIVE LEVELS
------------------------	-------------------------

C275.1	Demonstration of Various Unix Commands.	Understand Level (Level 2)
C275.2	Develop programs to create different types of processes under Linux environment.	Apply Level (Level 3)
C275.3	Develop programs to implement resource management task like CPU scheduling algorithms, deadlock handling.	Apply Level (Level 3)
C275.4	Develop programs to implement and test various synchronization techniques like semaphores, binary semaphore and monitors via different classical test suites.	Apply Level (Level 3)
C275.5	Examine the various disk-scheduling algorithms, memory management schemes, file management systems.	Analyze Level (Level 4)

Module No.	Topic	No. of Labs	COs
1.	Unix Commands	1	C275.1
2.	Process creation/ Inter process communication (IPC)	1	C275.2
3.	Processes creation using pthread library under Linux environment.	2	C275.2
4.	Synchronization techniques like semaphores, binary semaphore and monitors via different classical test suites.	2	C275.4
5.	Resource management task like CPU scheduling algorithms, deadlock handling.	1	C275.3
6.	Disk-scheduling algorithms, memory management schemes, file management systems.	1	C275.5

Evaluation Criteria

Components

Maximum Marks

Lab Test-1

20

Lab Test-2

20

Day-to-Day

60(Mini Project-20, Lab Assessment-30, Attendance-10)

Total

100

Project Based Learning: Project based learning: Each student works on different case studies in Lab Assignments. They utilize the concepts taught in the lab and develop projects in a group of 3-4. The course emphasized on the skill development for employability in software industry by engaging students on soft development methodologies of operating systems. Various activities are carried out to enhance the student's software development skills. Some of them are study of various scheduling methods, memory management techniques and file management techniques.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc.)	
Text book(s)	
1.	Charles Crowley "Operating System A Design Approach" TMH.
2.	Andrew S. Tanenbaum "Operating Systems Design and Implementation", Third Edition, Prentice Hall Publications 2006
3.	A.S. Tanenbaum, "Modern Operating Systems", 2 nd edition, Prentice Hall India.
4.	A. Silberschatz, P. Galvin, G. Gagne, "Operating systems concepts" Willey international company (Ninth edition)
Reference Book(s)	
5.	Gary Nutt, "Operating Systems – A modern perspective", Pearson Education
6.	David Solomon and Mark Russinovich, "Inside Microsoft Windows 2000", Third Edition, Microsoft Press
7.	Milan Milenkovic, "Operating Systems: Concepts and Design", McGraw-Hill computer science series
8.	ACM/IEEE transactions on operating systems concepts.
9.	www.vmware.com

Detailed Syllabus

Lab-wise Breakup

Course Code	15B17CI575	Semester ODD (specify Odd/Even)	Semester 5th Session 2024-2025 Month from Aug 24 to December 24
Course Name	Open Source Software Lab		
Credits	1	Contact Hours	2 hours

Faculty (Names)	Coordinator(s)	J62: Ms. Pushp J128: Dr. Janardan K Verma
	Teacher(s) (Alphabetically)	J62: Dr. Amanpreet Kaur, Dr. Deepti Singh, Dr. Indu Chawla, Dr. Megha Rathi, Dr. Purti Kohli, Dr. Rajiv Mishra

COURSE OUTCOMES		COGNITIVE LEVELS
CO1	Demonstrate the working of Git repository hosting service through git commands to manage files, support version control and contribute to open source community by providing enhanced versions.	Understand level (Level 2)
CO2	Implement python programs using lists, tuples, dictionaries, functions, Numpy, SciPy and Matplotlib.	Apply Level (Level 3)
CO3	Develop python programs to scrap and process data using Beautiful Soup, pandas and MongoDB.	Apply Level (Level 3)
CO4	Analyze baseline methods for pre-processing, clustering and classification algorithms using scikit-learn python libraries.	Analyze Level (Level 4)
CO5	Build J2EE Programs using JDBC Connectivity with SQL Database and Apache/ Glassfish as web servers.	Create Level (Level 6)

Module No.	Title of the Module	List of Experiments	CO	#Labs
1.	Introduction to GitHub & Sustainable Development Goals (SDG's)	<ul style="list-style-type: none"> Read and explore the Github and Sustainable Development Goals. Create a simple program and upload it on Github. Extract one open source project from Github. Perform the reverse engineering of the same. 	CO1	1
2.	Introduction to Python	<ul style="list-style-type: none"> Making use of lists, tuples, and dictionaries, indexing and slicing to access data 	CO2	1
3.	Python	<ul style="list-style-type: none"> Create user defined functions using built-in functions such as filter (f, a) from python libraries. 	CO2	2
4.	Numpy, SciPy, Matplotlib (Python)	<ul style="list-style-type: none"> Write python programs using various functions of Numpy, SciPy and Matplotlib library. 	CO2	2
5.	Beautiful Soup (Python), Pandas, MongoDB	<ul style="list-style-type: none"> Write a program using Beautiful Soup for scrapping data from web, store in csv files and process them. Write a program for processing data stored in MongoDB using Pandas. 	CO3	2
6.	Java Script, Java Servlet and Java Server Pages.	<ul style="list-style-type: none"> Write programs for building web-pages using java script. Buildweb-based applications using server-side programming – Java Server Pages (JSP) and Java Servlet. 	CO5	1
7.	Scikit-Learn (Python)	<ul style="list-style-type: none"> Write python programs for data analysis, feature engineering, clustering and classification. 	CO4	2

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	https://guides.github.com/
2.	https://sustainabledevelopment.un.org/
3.	Beazley, David, and Brian K. Jones. <i>Python cookbook: Recipes for mastering Python 3.</i> " O'Reilly Media, Inc.", 2013
4.	Basham, Bryan, Kathy Sierra, and Bert Bates. <i>Head first servlets and JSP: passing the Sun certified web component developer exam.</i> " O'Reilly Media, Inc.", 2004.
5.	McKinney, Wes. <i>Python for data analysis.</i> " O'Reilly Media, Inc.", 2013.

Detailed Syllabus

Course Code	15B17CI576	Semester Odd (specify Odd/Even)	Semester 5th Session 2024 -2025 Months from July 2024 to December 2024
Course Name	Information Security Lab		
Credits	1	Contact Hours	2

Faculty (Names)	Coordinator(s)	J62:Mradula Sharma J128: Akash
	Teacher(s) (Alphabetically)	J-62: Dr. Aastha Maheshwari, Dr. Arpita Jadhav Bhatt, Ms. Mradula Sharma, Dr. P. Raghu Vamsi, Dr. Sakshi gupta J-128: Akash

Course Outcomes (CO)	Description	Cognitive Level (Bloom's Taxonomy)
C374.1	Understand and demonstrate the foundational principles of information security by explaining the concepts of symmetric key cryptography, Data Encryption Standard, and public key cryptography.	Level-2 (Understanding Level)
C374.2	Apply the knowledge of symmetric key cryptography and key exchange algorithms to design and implement	Level-3 (Applying Level)

	secure communication protocols in client-server programming.	
C374.3	Assess and categorize the vulnerabilities in system by inspecting network traffic using Wireshark	Level-4 (Analyzing Level)
C374.4	Compare different steganography, antivirus and anti-worm solutions, assessing their effectiveness in protecting against malware threats.	Level-5 (Evaluating Level)
C374.5	Students will be able to design and implement information security measures for real-world applications.	Level-6 (Creating Level)

Module No.	Title of the Module	List of Experiments
1.	Cryptography	Introduction to Cryptography
2.	Ciphers	Implementation of Cipher using Transposition techniques and Caesar Cipher
3.	Ciphers	Implementation of Substitution Ciphers: Hill Cipher and Polyalphabetic Cipher
4.	Symmetric key cryptography	Introduction to Symmetric key cryptography
5.	Data Encryption Standard	Implementation of Data Encryption Standard (DES)
6.	Public key cryptography	Introduction to Public key cryptography and Digital signature
7.	Key Exchange Algorithm	Implementation of Diffie Hellman Key Exchange Algorithm
8.	Client server programming	Client server programming using TCP
9.	Client server programming	Implementation of DES and RSA using Client server programming
10.	Steganography	Introduction to Steganography
11.	Antivirus and Anti-Worms	Introduction to Antivirus and Anti-Worms, and Wireshark tool
12.	Applications of Information Security	Applications of Information Security to real world problems
13.	Wireshark	Understanding of Secure-socket layer, Application Layer (HTTP, FTP, DNS) using Wireshark tool

Project based learning: The students are grouped into groups of size 4-5 and will be implementing a secure client server program with required encryption techniques. The student will analyze the requirements and select the required solutions. This will help in the employability of students in the information security sector.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Information Security, Principles and Practice, , 2 nd Edition, Mark Stamp, Wiley, 2011
2.	Security in Computing 5 th Edition , Charles P Fleeger et. al. - Prentice Hall, 2015
3.	The InfoSec Handbook: An Introduction to Information Security- Apress Open, Nayak, Umesha, and UmeshHodeghatta Rao, 2014
4.	Information Security: The Complete Reference, 2 nd Edition- Mark Rhodes Ousley, 2013
5.	Cracking Codes with Python: An Introduction to Building and Breaking Ciphers-Al Sweigart, 2018

Detailed Syllabus

Lecture-wise Breakup

Course Code	15B19CI591	Semester Odd (specify Odd)	Semester V Session 2023- 2024
Course Name	Minor Project-1		
Credits	2	Contact Hours	4

Faculty (Names)	Coordinator(s)	ANKIT VIDYARTHI, HIMANSHU AGRAWAL
	Teacher(s) (Alphabetically)	ALL FACULTY

COURSE OUTCOMES		COGNITIVE LEVELS
C350.1	Gather the requirement of the tools, techniques, and programming language constructs to design the solution of the problem	Understanding (Level 2)
C350.2	Choose the best appropriate programming platform, language, tools, and data structure to implement the solution of the problem	Apply (Level 3)
C350.3	Illustrate the linking of the various modules and sub modules of the designed solution with proper demonstration	Analyzing (Level 4)
C350.4	Evaluate results to test the effectiveness of the proposed solution	Evaluating (Level 5)
C350.5	Managing to deploy the project with source code and Database (If prepared) on open source platform like Github and others.	Creating (Level 6)

Evaluation Criteria

Components	Maximum Marks
Viva-1	20
Viva-2	20
D2D	60
Total	100

Project-based learning: Each student in a group of 3-4 will have to develop a Minor Project based on different engineering concepts. The students can opt for any real-world application to implement Minor Project. The students have to implement the real-world problem using an open-source programming language. Project development will enhance the knowledge and employability of the students in the IT sector.

Detailed syllabus

Lecture-wise Breakup

Subject Code	16B1NHS432	Semester: ODD	Semester V Session 2024-2025 Months: from July to December
Subject Name	POSITIVE PSYCHOLOGY		
Credits	3	Contact Hours	(3-0-0)
Faculty (Names)	Coordinator(s)	Dr. Badri Bajaj (JIIT-62) & Dr. Shweta Verma (JIIT-128)	
	Teacher(s) (Alphabetically)	Dr. Badri Bajaj, Dr. Shweta Verma	

COURSE OUTCOMES		COGNITIVE LEVELS
CO1	Demonstrate an understanding of various concepts and perspectives of positive psychology	Understanding Level (C2)
CO2	Apply the concepts of positive psychology in day-to-day life	Applying Level (C3)
CO3	Evaluate interventions and strategies for overall positive functioning	Evaluating Level (C5)
CO4	Develop solutions for personal happiness, well-being, and mental health	Creating Level (C6)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Introduction to Positive Psychology	Overview, Perspectives, Classification and Measures: Human Strengths and Positive Outcomes.	6
2.	Prosocial Behavior	Empathy and Egotism; Altruism, Gratitude, and Forgiveness.	6
3.	Positive Emotions and Wellbeing	Emotional and Cognitive States; Focus on Application: Finding the positive in the Negative; Positive Emotions & Well-Being; Positive Emotions & Flourishing; Flow Experiences	6

4.	Happiness	Happiness and its Traditions; Determinants- Subjective Well-Being Hedonic Basis of Happiness; Life Satisfaction; Self –Realization: The Eudaimonic Basis of Happiness Happiness and Emotional Experiences; Other Facts of Life- Work & Unemployment; Intelligence; Education; and Religion.	6
5.	Mental Health	Mental Health and Behavior; Prevent the Bad and Enhance the Good.	6
6.	Positive Environments	Positive Schooling, Good at Work, Balance Between ME and WE.	6
7.	Living Well	Mindfulness; Contours of a Positive Life: Meaning & Means; Cultural Context, Every Stage of Life, Resilience, Positive Youth Development, Life Tasks of Adulthood, Successful Aging.	6
Total number of Hours			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Project, Quiz)	
Total		100	

Project based learning: Each student will think of some personal and professional goals. The student will apply the learnings from the course topics from the first five modules and make and execute plan for achievement of their goals. Each student can take help from any other student in the class. Students will devise strategies using learning from five modules of the course for reaching their goals. They will evaluate their strategies as well. Students will work on three to five goals (a mix of personal and professional goals)

Each student will make a presentation in the class and will also submit a project report.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Snyder, C.R., Lopez, S. J., & Pedrotti, J.T. <i>Positive Psychology: The Scientific and Practical Explorations of Human Strengths</i> , 4 th Ed., Sage Publications, 2018.
2	Steve, B., & Marie, C. <i>Positive psychology</i> , 1st Ed., Pearson Education India, 2014.
3.	Boniwell, I., & Tunariu, A. D., <i>Positive Psychology: Theory, Research and Applications</i> , 2 nd Ed., McGraw-Hill Education, 2019.
4.	Zelenski, J., <i>Positive Psychology: The Science of Well-being</i> , 1st Ed., Sage Publications, 2019.
5.	Snyder, C. R., Lopez, S. J., Edwards, L. M., & Marques, S. C. (Eds.), <i>The Oxford handbook of positive psychology</i> . 1st Ed., Oxford university press, 2020.

Detailed syllabus

Lecture-wise Breakup

Course Code	16B1NHS433	Semester: Odd	Semester: Session 2024-2025 Month from: July to Dec
Course Name	Financial Management		

Credits	3	Contact Hours	3 (3-0-0)
----------------	---	----------------------	-----------

Faculty (Names)	Coordinator(s)	Prof. Mukta Mani, Dr.Sakshi Varshney
	Teacher(s) (Alphabetically)	Prof. Mukta Mani, Dr.Sakshi Varshney

COURSE OUTCOMES		COGNITIVE LEVELS
C303-3.1	Understand the fundamental concepts of Financial Management and its various dimensions	Understanding (Level 2)
C303-3.2	Apply the knowledge of the time value of money, capital budgeting techniques, cost of capital and in taking long-term investment decisions	Applying (Level 3)
C303-3.3	Analyze the leverage capacity of a business and apply it in the selection of Long-term sources of finance.	Analyzing (Level 4)
C303-3.4	Evaluate the financial performance of a business through financial statements	Evaluating (Level 5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction	Basic financial concepts-Meaning of Accounting, Accounting Concepts and Conventions, Introduction to Double Entry system and Accounting equation, Definition and Objectives of Financial management	4
2.	Time value of Money	Compounding, Discounting, Annuity, Perpetuity, Loan Amortization	5

3.	Analysis of Financial Statements	Understanding of Balance Sheet and Income Statements, Ratio Analysis, Interpretation, Importance and limitations	5
4.	Capital Budgeting: Principle Techniques	Nature of Capital Budgeting, Evaluation Techniques: Discounting (NPV, IRR etc.) and Non-discounting Techniques (payback, ARR etc)	6
5.	Long Term Sources of Finance	Definition, types, advantages and disadvantages	4
6.	Concept and measurement of cost of capital	Definition, measurement of specific costs, computation of Overall Cost of Capital,	5
7.	Cash Flows for Capital Budgeting	Identification and determination of relevant cash flows	5
8.	Leverages and Capital Structure Decision and Working Capital Management	Break Even Analysis, Operating, Financial and combined leverage, Capital structure EBIT- EPS analysis, Concept of working capital management, practical considerations in Working capital management, Evils of Excess or Inadequate Working Capital, Cash Management – Receivables Management – Inventory Management	8
Total number of Lectures			42
Evaluation Criteria		Maximum Marks	
Components			
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Project+ Quiz+ Class participation)	
Total		100	

Project-based learning: Each student in a group of 4-5 will opt for a company which is listed in at least one of the stock exchanges of India. To make the subject application based, the students analyze the latest financial data and other information of the last two years of the chosen company by the financial tool of Ratio analysis and use this financial data for decision-making. Understanding the Balance Sheet and financial statements of the business firm enhances the student's knowledge of the organisational structure of the firm and financial analysis helps their employability in the financial sector.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Textbooks, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Chandra, P., <i>Financial Management Theory and Practice</i> , 11th ed., Tata McGraw Hill, 2022.
2.	Horne, J.C.V. and Wachowicz, J.M. <i>Fundamentals of Financial Management</i> , 13th ed., Pearson Publication, 2009. Accessed online: https://wps.pearsoned.co.uk/ema_uk_he_wachowicz_fundfinman_13/106/27149/6950308.cw/-/6950310/index.html
3.	Khan, M.Y. and Jain, P.K. <i>Financial Management: Text, Problems and Cases</i> , 8th ed., McGraw Hill Education, 2020.

Detailed Syllabus

Lecture-wise Breakup

Subject Code	16B1NHS434	Semester: ODD	Semester V Session 2024-25 July - December
Subject Name	Introduction to Contemporary Form of Literature		
Credits	3	Contact Hours	3 (3-0-0)

Faculty (Names)	Coordinator(s)	Dr. Monali Bhattacharya (Sector 62) Dr. Ekta Srivastava (Sector 128)
	Teacher(s) (Alphabetically)	Dr. Ekta Srivastava, Dr. Monali Bhattacharya

Course Outcomes:		
	Course Outcome	COGNITIVE LEVELS

C303-6.1	Interpret & relate with the genres, periods, and conventional as well as experimental forms of literature.	CL-2 Understand
C303-6.2	Apply literary and linguistic theories on the texts to identify them as cultural constructs.	CL-3 Apply
C303-6.3	Analyze select representative texts of different cultures thematically and stylistically.	CL-4 Analyse
C303-6.4	Evaluate literature as reflection of society through a research-based paper/poster presentation individually and / or in a team.	CL-5 Evaluate
C303-6.5	Create literary, non-literary write-up with proper applied grammar usage.	CL-6 Create

Module No.	Subtitle of the Module	Topics in the module	No. of Hours for the module
1.	Introducing Literary Theories	<ul style="list-style-type: none"> From Formalism to Reader Response Theory: Major Terms & Concepts Narrative Art & Narratology Language & Style: An Introduction 	12
2.	Introducing New Forms & Sub Genres Today: Features & Portions	<ul style="list-style-type: none"> New Fiction: Graphic Novels, Cyberpunk Non-Fiction: Memoirs & Autobiographies, Biographies 	4
3.	Modern Retellings/ Children's Literature	<i>Cinderella (Poem) - Roald Dahl</i>	3
4.	European Lit./Travel/ Memoir/ Spiritual Literature	<i>Eat, Pray & Love (Travelogue & cinematic adaptation)</i>	4
5.	Written Communication Through Non-Fiction	<i>Personal Narratives (Diary, Blog, Memoirs, Travelogue)</i>	4
6.	Commonwealth / Indian Literature	<i>Hayavadana (Short Play) - Girish Karnad</i>	4

7.	Afro-American Lit/ Post Colonial Literature	<i>Sweetness (Short Story) – Toni Morrison</i>	3
8	Sci-fi (Cyberpunk)	<i>Neuromancer (Science Fiction) – William Gibson</i>	4
9	Canadian Literature/ Speculative Fiction	<i>The Penelopiad- Margaret Atwood</i>	4
Total number of Hours			42

Evaluation Criteria	
Components	Maximum Marks

Detailed Syllabus

Lecture-wise Breakup

Subject Code	16B1NHS435	Semester : ODD	Semester: V Session: 2024-25 Month: July 2024 to December 2024
---------------------	-------------------	-----------------------	--

Subject Name	SOCIOLOGY OF MEDIA		
Credits	3	Contact Hours	(3-0-0)

Faculty (Names)	Coordinator(s)	Prof. Alka Sharma
	Teacher(s) (Alphabetically)	Dr Nibha Sinha

CO Code	COURSE OUTCOMES	COGNITIVE LEVELS
C303-2.1	Demonstrate a basic understanding of different concepts used in the systematic study of Sociology of Media	Understanding(C 2)
C303-2.2	Examine various sociological theoretical orientations towards media and society.	Analyzing(C 4)
C303-2.3	Analyze the key issues related to the processes of Production of Media, Popular Culture and consumer culture.	Analyzing(C 4)
C303-2.4	Critically evaluate the Cultural Consumption, Social Class & the process of construction of subjectivities and audience reception in new Media	Evaluating(C 5)
C303-2.5	Create positive and critical attitude towards the use of new media and understanding of threats of Digital Age	Creating(C 6)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction	Introduction to the Course	1
2.	Theoretical Orientation	Functionalist Approach to the Sociology of Media and Popular Culture Critical Approach to the Sociology of Media and Popular Culture Symbolic Interactionist Approach to the Sociology of Media and Popular Culture Different theories of Media	8
3.		<ul style="list-style-type: none"> ● What is popular culture? ● Difference between 'pop' culture and 'high' culture ● What distinguishes popular culture from other kinds of culture (art, folk culture)? Is there a distinction at all anymore? ● Visualizing Society through 'pop' culture/ media ● Risks and rituals that come with Popular Culture 	8

	Concept of Popular Culture and its critical analysis		
4.	New media	<ul style="list-style-type: none"> ● Difference between tradition media and new media ● New media as technology ● New Information Technology (brief history in case of India) 	5
5.	Media & State	<ul style="list-style-type: none"> ● Mediatization of Society ● Free-speech Media 	5
6.	Consumption of Media and Media reception	<ul style="list-style-type: none"> ● Social Actors as Audience/ Audience as market– Theory ● Media effects: Media and representations (gender, ethnic)- the under-representation and misrepresentation of subordinate groups. ● Media and the construction of reality: media logic and cultivation analysis theory ● Information Society vs Informed Society ● Cultural Consumption and Social Class 	8
7.	Media in Global Age	<ul style="list-style-type: none"> ● Rise of Network Society- Manuel Castells ● Global Media: impact of market & state ● Global Perspectives: The world on our doorstep ● Marketing and aesthetics in everyday life 	7

Discrete Mathematics (16B1NMA531)

Course Description

Course Code	16B1NMA531	Semester Odd	Semester V Session 2024-25 Month from Aug 2024- Dec 2024
Course Name	Discrete Mathematics		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Dr. Anuj Bhardwaj	
	Teacher(s) (Alphabetically)	Dr. Anuj Bhardwaj	
COURSE OUTCOMES: After the successful completion of this course, the student will be able to			COGNITIVE LEVELS
C301-1.1	recall basics of set theory, functions and relations.		Remembering (C1)
C301-1.2	explain lattices, generating function, propositional calculus, algebraic structure, graphs and formal languages.		Understanding (C2)
C301-1.3	solve the problems related to Z- transform, propositional calculus, algebraic structures and formal languages.		Applying (C3)
C301-1.4	analyse different graph theoretic algorithms for solving related problems.		Analyzing (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Relations and Lattices	Relations and their composition. Pictorial representation, matrix and graphical representations. Equivalence relations and partitions. Partial ordered relations and Hasse diagram. Lattices.	5
2.	Functions	Functions and Recursively defined functions, generating functions, solution of recurrence relations by generating function. Z transforms, solution of difference equations by Z transform.	8
3.	Propositional Calculus	Propositions- simple and compound. Basic logical operators. Implication. Truth tables. Tautologies and contradictions. Valid arguments and fallacy. Propositional functions and quantifiers.	4
4.	Graphs	Graphs and related definitions, subgraphs, isomorphism, paths and connectivity. Eulerian graph and Konigsberg problem. Hamiltonian graph. Labelled and weighted graphs. Tree Graphs- Minimum spanning Tree (Prim's algorithm). Graph colorings. Four color problem.	7
5.	Directed Graphs	Trees, Digraphs and related definitions. Rooted trees. Algebraic expressions and Polish notation. Sequential representation. Adjacency matrix. Path matrix. Shortest path. Linked representation of directed graphs. Binary trees.	5
6.	Algebraic Structures	Groups- definitions and examples, order of elements, subgroup, condition for subgroups. Quotient groups, Lagrange theorem and applications, Rings, integral domains and Fields- definition and examples.	7
7.	Languages and Grammars	Strings (words) and languages, grammars, types of grammars, Finite state machines, finite state automata, regular languages and regular expressions.	6
Total number of Lectures			42

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25 (Quiz, Assignments, Tutorials, PBL)
Total	100

Recommended Reading material:

1.	Lipschutz, S. and Lipson, M., Discrete Mathematics, 2 nd Edition, Tata McGraw-Hill, 1997.
2.	Rosen, K. H., Discrete Mathematics and its Application, 7 th Edition, Tata McGraw-Hill, 2011.
3.	Liu, C. L., Elements of Discrete Mathematics, 2 nd Edition, Tata McGraw-Hill, 1998.

4.	Kolman, B., Busby, R. C. and Ross, S., Discrete Mathematical Structures, 6 th Edition, Prentice Hall, 2018.
5.	Deo, N., Graph Theory, Prentice Hall, 2004.
6.	Grimaldi, R.P., Discrete and Combinatorial Mathematics, 5 th Edition, Pearson Education, 2011.

Theory of Numbers (16B1NMA731)

Course Description

Course Code	16B1NMA731	Semester Odd	Semester V Session 2024-25 Month from Aug2024- Dec 2024
Course Name	Theory of Numbers		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Dr. Himanshu Agarwal	
	Teacher(s) (Alphabetically)	Dr. Himanshu Agarwal	
COURSE OUTCOMES			COGNITIVE LEVELS
After pursuing the above mentioned course, the students will be able to:			
C301-4.1	explain concepts related to divisibility, congruences, numbers of special form, number theoretic functions, primitive roots and indices.		Understanding (C2)
C301-4.2	solve the system of linear congruences using properties of congruences, Euclid algorithm and Chinese remainder theorem.		Applying (C3)
C301-4.3	apply the concepts of primitive roots, indices, Legendre symbol and quadratic residue to solve the nonlinear congruences.		Applying (C3)
C301-4.4	analyze the concepts of number theory in hashing, cryptography, calendar and ISBN check digits problems.		Analyzing (C4)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Divisibility and Primes	Division algorithm, Greatest common divisor, Euclid's algorithm, gcd as a linear combination of coprime integers, Linear Diophantine equations, primes, The fundamental theorem of arithmetic, The Sieve of Eratosthenes, Canonical prime factorization, Least common multiple, Prime number theorem(statement only), Goldbach and twin primes conjectures.	5
2	Theory of Congruences	Definitions and basic properties, Residue classes, complete residue systems, reduced residue systems, Linear congruences in one variable, Simultaneous linear congruences, Chinese remainder theorem and its applications, Linear congruences in more than one variable, Fermat's	4

		theorem, Pseudoprimes and Carmichael numbers, Wilson's Theorem	
3.	Number Theoretic Functions and Numbers of Special Form	Greatest integer function, The number-of-divisors function, The sum-of-divisors function, Multiplicative function, The Mobius function, Mobius inversion formula, The Euler's totient function, Euler's theorem, Perfect numbers, characterization of even perfect numbers, Mersenne primes, Fermat primes	8
4.	Primitive Roots and Indices	The order of an integer, Primitive roots, Theory of indicies, Solution of non-linear congruences.	9
5.	Quadratic Residues	Quadratic residues and non-residues, Euler's Criterion, The Legendre symbol, Gauss Lemma, Quadratic reciprocity, Solution of quadratic congruences.	8
6.	Applications	Hashing functions, Cryptosystem, Calendar problem, ISBN check digits	8
		Total Number of Lectures	42

<p>Evaluation Criteria</p> <p>Components Maximum Marks</p> <p>T1 20</p> <p>T2 20</p> <p>End Semester Examination 35</p> <p>TA 25 (Quiz, Assignments, Tutorials, PBL)</p> <p>Total 100</p>	
<p>Project based learning: Each student in a group of 4-5 will analyse applications of Chinese remainder theorem in congruency problems. Also the students will explore the applications of secure communication techniques, Cryptosystem, Calendar problem, ISBN check digits.</p>	
<p>Recommended Reading (Books/Journals/Reports/Websites etc.: Author(s), Title, Edition, Publisher, Year of Publication etc. in IEEE format)</p>	
1.	James Strayer , Elementary Number Theory, Waveland Press, 1994/2002, ISBN 1-57766-224-5.
2.	Kenneth Rosen , Elementary Number Theory and its Applications, 5th Edition, McGraw Hill, ISBN 0-201-87073-8.
3.	I. Niven, H. Zuckerman, H. Montgomery , An Introduction to the Theory of Numbers, 5th Edition, Wiley, ISBN 0471625469.
4.	David M. Burton , Elementary Number Theory, 7 th Edition, McGraw Hill Education (India) Private Limited.

Detailed Syllabus
Lecture-wise Breakup

Course Code	16B1NPH531	Semester: ODD	Semester V Session 2024 -2023 Month from July to December
Course Name	Quantum Mechanics for Engineers		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Prof. Papia Chowdhury
	Teacher(s) (Alphabetically)	Prof. Papia Chowdhury

COURSE OUTCOMES		COGNITIVE LEVELS
C301-10.1	Remember basics of Quantum Mechanics and its applications.	Remembering (C1)
C301-10.2	Explain postulates of quantum mechanics, Dirac notation, Schrödinger Equation, Perturbation theory and Qubits.	Understanding (C2)
C301-10.3	Solve various problems related to different quantum systems and construct quantum circuits using quantum gates.	Applying (C3)
C301-10.4	Analyse the results obtained for various physical systems and to establish the advantages of some simple protocols of quantum information processing.	Analyzing (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction	Wave particle duality, quantum physics (Planck and Einstein's ideas of quantized light), postulates of quantum mechanics, time dependent and time independent Schrodinger equation, operators, probability theory, expectation values, and uncertainty principle and its implications, no cloning applications	8
2.	Measurement Theory with Applications	Matrix and linear algebra, Eigen values and eigenfunctions Hilbert space, Kets, Bras and Operators, Bras Kets and Matrix representations, Measurements, Stern Gerlach	10

		Experiment, Observables and Uncertainty Relations, No-cloning theorem, Pauli Spin Matrices.	
3.	Potential problems	1-D, 2-D, and 3-D potential problems (including infinite and finite square well). Tunneling, harmonic oscillator, separation in spherical polar coordinates, hydrogen atom, etc.),	08
4.	Approximation methods	Time independent perturbation theory for nondegenerate and degenerate energy levels.	4
5.	Advanced Applications	Kronig Penny model, Basic ideas of quantum computing, Qubit, Gate model of quantum computing: H, CNOT, Pauli Gates, BB84 protocol, Advantages of quantum computing, Quantum wire, Quantum dot and realization of CNOT using Quantum dot.	10
Total number of Lectures			40
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 [Attendance (05 M), Class Test, Quizzes, <i>etc</i> (06 M), Assignments in PBL mode (10 M), and Internal assessment (04 M)]	
Total		100	

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	The new quantum universe by Toney Hey and Patrick Walters, Cambridge University Press.
2.	Quantum mechanics a new introduction by Kenichi Konishi and G Paffuti, OUP., 2009
3.	Quantum physics by Eyvind H Wichman (Berkeley Physics course Vol 4) Tata McGraw Hill 2008
4.	Elements of quantum computation and quantum communication by A Pathak, CRC Press 2013.
5.	Introduction to Quantum Mechanics by David J. Griffiths, Second Edition, Pearson, 2015.

Project Based Learning: Students may do projects on various applications of quantum mechanics like quantum computing and quantum information. This will help them apply theory learnt to more advanced problems in quantum mechanics. This should help students develop research-based learning which is very important in emerging technologies like quantum computing and information.

Lecture-wise Breakup

Course Code	16B1NPH532	Semester: ODD	Semester: 5 th Session: 2024 -2025 Month from July 24 to December 24
Course Name	Materials Science		
Credits	3	Contact Hours	3

Faculty (Names)	Coordinator(s)	Dr. Amit Verma and Dr. Ashish Bhatnagar
	Teacher(s) (Alphabetically)	Dr. Amit Verma and Dr. Ashish Bhatnagar

COURSE OUTCOMES		COGNITIVE LEVELS
C301-11.1	Recall variety of engineering materials for their applications in contemporary devices	Remembering (C1)
C301-11.2	Explain dielectric, optical, magnetic, superconducting, polymer and thermoelectric properties	Understanding (C2)
C301-11.3	Apply properties of dielectric, optical, magnetic, superconducting, polymer and thermoelectric materials to solve related problems	Applying (C3)
C301-11.5	Prove and estimate solution of numerical problems using physical and mathematical concepts involved with various materials	Evaluating (C5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Dielectric Materials	Polarization mechanism & Dielectric Constant, Behavior of polarization under impulse and frequency switching, Dielectric loss, Spontaneous polarization, Ferroelectrics, Piezoelectric effect; Applications of Dielectric Materials	10
2.	Optical Materials	Basic Concepts, Light interactions with solids, Optical properties of nonmetals: refraction, reflection, absorption, Beer-Lambert law, transmission, Photoconductivity. Drude Model, relation between refractive index and relative dielectric constant, Optical absorption in metals, insulators and semiconductors. Introduction to Photonic band gap (PBG) materials and its applications	6
3.	Magnetic Materials	Concept of magnetism, Classification – dia-, para-, ferro-, antiferro- and ferri-magnetic materials, Their properties and Applications; Hysteresis; Magnetic Storage and Surfaces.	10

4.	Super conducting Materials	Meissner effect, Critical field, type-I and type-II superconductors; Field penetration and London equation; BCS Theory, High temperature Superconductors and their Applications	5
5.	Polymers and Ceramics	Various types of Polymers and their applications; Mechanical behavior of Polymers, synthesis of polymers; Structure, Types, Properties and Applications of Ceramics; Mechanical behavior and Processing of Ceramics.	6
6.	Thermoelectric Materials	Thermoelectric (TE) effects and coefficients (Seebeck, Peltier, Thompson); TE materials and devices, Heat conduction, Cooling, Figure of Merit; TE power generation (efficiency), refrigeration (COP), Examples and applications.	3
		Total number of Lectures	40

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA teacher assessment (5)]	25 [Quiz/class test (7), attendance (7), PBL assignment (6) and
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	S.O. Pillai, Solid State Physics, New Age International Publishers.
2.	B. B. Laud, Laser and Non-linear Optics, John Wiley & Sons
3.	Van Vlack, Elements of Material Science and Engineering, Pearson Education.
4.	Srivastava and Srinivasan, Material Science and Engineering,
5	W.D. Callister Jr., Material Science and Engineering: An Introduction, John Wiley.

Project Based Learning: Students will make application oriented individual projects on selected material (dielectric, magnetic, superconducting, optical and Thermoelectric etc.) depending on its suitability for advanced application such

as medical diagnostic, sensing (pertaining to current pandemic situation) and similar. Each project will envisage the material properties, the working principles, advantages and disadvantages of that specific material as well as the possible advancement from the literature. This will be a group project and students will work in a group of 3-4 students. This project will make them prepared for industry jobs in the material industry or for higher studies in similar fields.

Detailed Syllabus

Lecture-wise Breakup

Course Code	16B1NPH533	Semester Odd (specify Odd/Even)	Semester 5th Session 2024-2025
Course Name	Laser Technology and Applications		
Credits	3	Contact Hours	3
	Month from July to December		

Faculty (Names)	Coordinator(s)	Navneet Kumar Sharma, Anshu D. Varshney
	Teacher(s) (Alphabetically)	Anshu D. Varshney, Navneet Kumar Sharma

COURSE OUTCOMES		COGNITIVE LEVELS
C301-12.1	Defining the properties and principle of lasers	Remember Level (C1)
C301-12.2	Understanding of various applications of lasers	Understand Level (C2)

C301-12.3	Ability to apply the concepts of standard techniques for the pulsed operation of laser and stability of laser resonator	Apply Level (C3)
C301-12.4	Analysis of types of lasers	Analyze Level (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Fundamentals of Lasers	Laser idea and properties; Monochromaticity, directionality, brightness, Temporal and spatial Coherence. Interaction of radiation with matter; Absorption, spontaneous and stimulated emission of radiation, Rates equations, Einstein's A and B coefficients. Laser rate equations: Four level and three level systems. Conditions for producing laser action, population inversion, saturation intensity, threshold condition and gain optimization. Experimental techniques to characterize laser beam.	12
2.	Types of Lasers	Pumping processes; optical and electrical pumping. Optical Resonators; The quality factor, transverse and longitudinal mode selection; Q switching and Mode locking in lasers. Confocal, planar and spherical resonator systems. Types of Lasers; Solid state Lasers; Ruby Laser, Nd:YAG laser. Gas lasers; He-Ne laser, Argon laser, CO ₂ , N ₂ and Excimer Laser. Dye (liquid) Laser, Chemical laser (HF), Semiconductor Lasers; Heterostructure Lasers, Quantum well Lasers. Free electron laser, X-ray laser and Ultrafast Laser.	16
3.	Applications of Lasers	Image processing; Spatial frequency filtering and Holography, Laser induced fusion; Fusion reactor, creation of Plasma. Lightwave communications. Use in optical reader (CD player) and writer. Nonlinear optics; harmonic generation, self focusing. Lasers in industry; Material processing, Cutting, welding and hole drilling. Precision length measurement, velocity measurement, Laser Tracking, Metrology and LIDAR. Lasers in medicines and surgery. Lasers in defense, Lasers in space sciences, Lasers in sensors.	12
Total number of Lectures			40

Evaluation Criteria	
Components	Maximum Marks
T1	20
T2	20

End Semester Examination	35
TA	25 [Attendance (05 M), Class Test, Quizzes, etc (06 M), Assignments in PBL mode (10 M), and Internal assessment (04 M)]
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Thyagarajan and Ghatak, <i>Lasers Theory and Applications</i> , Macmilan India.
2.	W. T. Silfvast, <i>Laser Fundamentals</i> , Cambridge Univ-Press.
3.	O. Svelto, <i>Principles of Lasers</i> , Springer.
4.	Saleh and Teich, <i>Fundamentals of Photonics</i> , John Wiley & Sons.

Project based learning: Each student in a group of 4-5 students will opt a topic and will do the theoretical study in detail. The students will submit their report. To make the subject application based, the students analyze the optical fiber applications, holography applications and use of photons in memory devices. This shall improve the skills and employability of the students in laser and photonic industries.

Detailed Syllabus
Lecture-wise Breakup

Course Code	16B1NPH535	Semester: ODD	Semester: 5th Session: 2024-25
Course Name	Nuclear Science and Engineering		
Credits	3	Contact Hours	3

Faculty (Names)	Coordinator(s)	Dr. Manoj Tripathi/ Dr. Anuj Kumar
	Teacher(s) (Alphabetically)	Dr. Manoj Tripathi/ Dr. Anuj Kumar

COURSE OUTCOMES		COGNITIVE LEVELS
C301-14.1	Relate terminology and concepts of nuclear science with various natural phenomenon and engineering applications.	Remembering (C1)
C301-14.2	Explain various nuclear phenomenon, nuclear models, mass spectrometers, nuclear detectors, particle accelerators. and classify elementary particles.	Understanding (C2)
C301-14.3	Solve mathematical problems for various nuclear phenomenon and nuclear devices.	Applying (C3)
C301-14.4	Analyze the results obtained for various physical problems and draw inferences from the results.	Analyzing (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Nuclear Constituents and their properties, Nuclear Forces	Rutherford scattering and estimation of nuclear size, Constituents of the nucleus and their properties, Nuclear Spin, Moments and statistics, Magnetic dipole moment, Electric quadrupole moment. Nuclear forces, Two body problem - Ground state of deuteron, Central and non-central forces, Exchange forces: Meson theory, Yukawa potential, Nucleon-nucleon scattering, Low energy n-p scattering, Effective range theory, Spin dependence, charge independence and charge symmetry of nuclear forces, Isospin formalism.	07
2.	Nuclear Models	Binding energies of nuclei, Liquid drop model: Semi-empirical mass formula, Mass parabolas, Prediction of Nuclear stability, Bohr-Wheeler theory of fission, Shell model, Spin-orbit coupling. Magic numbers, Angular momenta and parities of nuclear ground state, Magnetic moments and Schmidt lines, Collective model of a nucleus.	05

3.	Nuclear decay and Nuclear reactions	Alpha decay, Beta decay, Pauli's Neutrino hypothesis- Helicity of neutrino, Theory of electron capture, Non-conservation of parity, Fermi's theory, Gamma decay: Internal conversion, Multipole transitions in nuclei, Nuclear isomerism, Artificial radioactivity, Nuclear reactions and conservation laws, Q-value equation, Centre of mass frame in nuclear Physics, Scattering and reaction cross sections, compound nucleus, Breit-Wigner one level formula	08
4.	Interaction of nuclear radiation with matter	Interaction of charge particles with matters: Bohr's ionization loss formula and estimation of charge, mass and energy. Interaction of electromagnetic radiation with matter, Linear absorption coefficient. Nuclear particle detectors and neutron counters.	07
5.	Accelerator and reactor Physics	Different types of reactors, tracer techniques, activation analysis. Radiation induced effects and their applications: Accelerators: Linear accelerators, Van de Graff generator, LINAC, Cyclotrons, Synchrotrons, Colliders.	06
6.	Cosmic radiation and Elementary Particles	Cosmic radiation: Discovery of cosmic radiation, its sources and composition, Latitude effect, altitude effect and east-west asymmetry, secondary cosmic rays, cosmic ray shower, variation of cosmic intensity and Van Allen radiation belt. Elementary particles: Classification of particles, K-mesons, Hyperons, particles and antiparticles, fundamental interactions, conservation laws, CPT theorem, resonance particles and hypernucleus, Quark model.	07
Total number of Lectures			40
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 [Attendance (05 M), Class Test, Quizzes (06 M), Assignments in PBL mode (10 M), and Internal assessment (04 M)]	
Total		100	

Project Base Learning Different groups of students with 5-6 students in each group may be formed and these groups may be given to complete a task like identifying common applications to nuclear science, recent developments in nuclear science, etc. The students may be asked to make presentations on topics like radioactive dating or nuclear models and their applications. Devices like linear accelerators, cyclotrons etc. may also be included. The students may also be asked to study the recent developments in nuclear science/ engineering and present them.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	K.S. Krane, 1987, Introductory Nuclear Physics, Wiley, New York.
2.	I. Kaplan, 1989, Nuclear Physics, 2nd Edition, Narosa, New Delhi.
3.	B.L. Cohen, 1971, Concepts of Nuclear Physics, TMH, New Delhi.
4.	R.R. Roy and B.P. Nigam, 1983, Nuclear Physics, New Age International, New Delhi.

5.	H.A. Enge, 1975, Introduction to Nuclear Physics, Addison Wesley, London.
6.	Y.R. Waghmare, 1981, Introductory Nuclear Physics, Oxford-IBH, New Delhi.
7.	R.D. Evans, 1955, Atomic Nucleus, McGraw-Hill, New York.

Credits	3-0-0	Contact Hours	3

Faculty (Names)	Coordinator(s)	Dr. Meenal Jain (JIIT 62), Dr. Kedar Nath Singh (JIIT128)
	Teacher(s) (Alphabetically)	JIIT 62: 1. Amarjeet Kaur 2. Anuja Shukla 3. Jagriti 4. Dr. Kirti Aggarwal 5. Dr. Meenal Jain 6. Shivendrav Singh JIIT128: Dr. Anubhuti Roda Mohindra, Dr. Charu, Dr. Gaurav Kumar Nigam, Dr. Kedarnath Singh

COURSE OUTCOMES		COGNITIVE LEVELS
CO1	Defining the basics of networking, components and underlying technologies	Remember (Level 1)
CO2	Illustrate the various key protocols in OSI model and TCP/IP protocol suite and explain various application protocols.	Understand (Level 2)
CO3	Identification and description of various components, architectures and protocols of Internet of Things (IoT) and their real life problems.	Understand (Level 2)
CO4	Choose the appropriate network layer and data link layer protocols based on the specific requirements of the communication environment.	Apply (Level 3)
CO5	Explain various transport protocols and its performance enhancing mechanisms.	Analyze (Level 4)
CO6	Determine the shortest path for the network using various routing protocols and evaluate it.	Evaluate (Level 5)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Introduction	Network terminologies, Network Models, Protocol layers and their services, Connection Oriented and Connectionless services, Physical Media.	4
2.	The Application Layer	Principles of Application-Layer Protocols, HTTP, File Transfer: FTP, DNS, Electronic Mail in the Internet	4
3.	The Transport Layer	Transport-Layer Services and Principles, Multiplexing and Demultiplexing Applications, UDP and TCP, Connection Establishment, Transport Layer Protocols (go back N, stop and wait, selective repeat), Flow Control, TCP Congestion Control	8
4.	The Network Layer	Introduction and Network Service Model, IP: the Internet IP addressing, Routing Principles, Protocol, Routing in the Internet,	9
5.	The Link Layer and Local Area Networks	The Data Link Layer: Introduction, Services, Error Detection and Correction, Multiple Access Protocols and LANs, LAN Addresses and ARP, IEEE standards and Ethernet	6

6.	Introduction to Internet of Things	Introduction to IoT, IoT reference Model - IoT Reference Architecture, M2M architecture, IOT devices	5
7	IoT protocols	Introduction to IOT protocols: IEEE 802.11, LoRaWAN, 6LoWPAN, RPL and MQTT and CoAP	6
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Attendance = (5), Assignments/Mini- Project= (20))	
Total		100	

Project Based Learning: Each student in a group of 2-4 will choose some real-world problems such as congestion control, building smart devices, network traffic analyser etc. for development and analysis. By applying the different network protocol layer concepts and with the help of simulators it helps the students in enhancing their understanding and skills towards networking, communication and IoT related issues leading towards employability in IT and hardware sector.

Detailed Syllabus

Lecture-wise Breakup

Course Code	20B12CS331	Semester : Odd	Semester 5th Session 2024-2025 Month: July 2024 to Dec 2024
Course Name	Fundamentals of Machine Learning		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Sherry Garg (62), Varsha Garg (128)
	Teacher(s) (Alphabetically)	Sherry Garg ,Varsha Garg

COURSE OUTCOMES		COGNITIVE LEVELS
C330-1.1	Understand the mathematical concepts of machine learning approaches.	Understand (Level 2)
C330-1.2	Apply the fundamentals of linear algebra and probability theory to the machine learning problems.	Apply (Level 3)
C330-1.3	Apply the concepts of regression analysis and vector calculus to the machine learning models.	Apply (Level 3)
C330-1.4	Analyze the role of dimensionality reduction and density estimation for machine learning problems	Analyze (Level 4)
C330-1.5	Evaluate and test the significance of machine learning results statistically.	Evaluate (Level 5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
-------------------	----------------------------	-----------------------------	---------------------------------------

1.	Introduction to Machine learning	Why machine learning, learning problems, types of learning: supervised, unsupervised, semi-supervised learning, fundamentals of machine learning	02
2.	Linear Algebra	Linear equations, solving linear equations, matrices, Cholesky Decomposition, singular value decomposition, matrix approximation, vector space, Norms, inner product, length and distances, angles and orthogonality, orthogonal complement, inner product, orthogonal projections and rotations, linear independence, linear mapping, Affine spaces	09
3.	Probability Theory	Discrete and continuous probability, sum rule, product rule, Baye's Theorem, Gaussian Estimation, conjugacy and exponential family, inverse transform, Hidden Markov model	05
4.	Regression Analysis	Problem formulation, parameter estimation, linear regression vs non-linear regression models, univariate vs multivariate regression, regression using least squares, logistic regression in machine learning	05
5.	Vector Calculus	Gradients of vector valued function, gradient descent learning, lagrange's function in supervised learning, automatic differentiation, linearization and multivariate taylor series in machine learning	07
6.	Dimensionality Reduction and Density Estimation	Maximum variance, Low rank approximation, PCA, ICA, LDA, latent Variable, GMM, Maximum Likelihood estimation, expected maximization machine learning	08
7.	Statistical Validations	T test, paired T test, Z test, hypothesis testing, ANOVA, Pearson coefficient, significance testing	06
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Term		35	
TA		25 Attendance (10), Assignment/Quiz/Mini-Project (15)	
Total		100	

Project based learning: Each student in a group of 3-4 will have to develop a mini project based on fundamentals of machine learning algorithms. The students can opt any real-world application where these algorithms can be applied. The students have to implement the mini project using any open source programming language. Project development will enhance knowledge and employability of the students in IT sector.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text Books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

Text Book(s):	
1.	Goodfellow, Ian, YoshuaBengio, and Aaron Courville. (2016). Deep learning. MIT press.
2.	Deisenroth, Marc Peter, A. Aldo Faisal, and Cheng Soon Ong. (2020). Mathematics for machine learning. Cambridge University Press.
Reference Book(s):	
1.	Mitchell, Tom M. (1997). Machine learning.
2.	Bishop, Christopher M. (2006). Pattern recognition and machine learning. Springer.
3.	Hastie, Trevor, Robert Tibshirani, and Jerome Friedman. (2009). The elements of statistical learning: data mining, inference, and prediction. Springer Science & Business Media.

Detailed Syllabus

Subject Code	20B12CS334	Semester odd	Semester: B.Tech 5th Semester Session ODD 2024 Month from July to December
---------------------	------------	---------------------	--

Subject Name	Object Oriented Analysis and Design Using JAVA		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Prakhar Mishra (J128) and Preeti Mittal (J62)
	Teacher(s) (Alphabetically)	Prakhar Mishra (J128) and Preeti Mittal (J62)

COs	Description	Cognitive Level (Bloom Taxonomy)
C333-1.1	Explain Object-Oriented Analysis and Design principles	Understand Level (C2)
C333-1.2	Construct UML diagrams for structural and behavioral modeling	Apply Level (C3)
C333-1.3	Design and implement software solutions using object-oriented analysis and design	Apply Level (C3)
C333-1.4	Analyze requirements to identify use cases, classes, and objects	Analyze Level (C4)
C333-1.5	Evaluate software design complexity using metrics	Evaluate Level (C5)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Introduction to Principles of Object-Oriented Analysis and Design	Programming Paradigms, Introduction to Object Oriented Paradigm, Principles of Object Orientation, Software Complexity: development process, flexibility, behaviour of discrete system, The canonical Form of the complex system, Benefits and Understanding the challenges OOAD can address, Overview of Software Development Life Cycle (SDLC), Object- Oriented Requirements Elicitation & Analysis and Systems Behavior, Quality Attributes	5
2.	Object Oriented Analysis	Identifying Classes and Objects, Responsibilities, Relationships in problem domain, Object Model, Methods of Class Identification, Listing nouns and Verbs, Synonyms, Attributes and Methods Quality Check: Coupling, cohesion, sufficiency, completeness, primitiveness	8
3.	Structural modeling and	UML structure: Overview of static and dynamic UML diagrams, Modeling System Behavior with use case	15

	its implementation in JAVA	<p>diagram and notations, From Use Cases to Functional Requirements, Elements of object and class diagram with notations: object, class, link, association, multiplicity, link attributes, association end names, association classes, qualified association, association ends, N-ray association, aggregation and composition, generalization, abstract class.</p> <p>Objects and Classes in JAVA, implementing various relationships in JAVA- Association, Inheritance, generalization, Abstraction in Java, Method Overriding and Overloading, Object Roles, Class Types, Implementing Polymorphism, Extensibility and UML, Generalization with Interfaces and Packages in Java</p>	
4.	Behavioral modeling	Sequence & Collaboration diagram with notations, Object Collaborations, Interaction Diagrams, State Diagram - Event, Change Event, Signal Event, Call Event, Time Event, States, Transition & Conditions, Transition, Guard Condition, Action, State Diagrams, One shot State Diagram, Creating State Diagram, State Diagram Behavior, Activity, Do-activity, Entry Activity, Exit Activity, Nested State Diagram, Nested States, Signal Generalization, Concurrency, Activity and Swim lane diagram	4
5.	Design Principles	SOLID principles, Cohesion, Coupling, techniques for good Object-Oriented design, separation of concerns, information hiding, and conceptual integrity	6
6.	OO Design Metrics	Understanding and Analyzing Software Design Metrics for Object Oriented Software.	4
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Attendance = 10, Assignment/Quiz/Mini-project=15)	
Total		100	

Project Based Learning: Each group of 3-4 students will work on a mini-project. They will identify a real-life problem and develop a solution using their knowledge of the object-oriented approach. The project implementation should preferably be in JAVA and should be accompanied by comprehensive documentation covering various aspects of the software. This approach enhances students' understanding of different object-oriented concepts and prepares them for practical applications in the workforce.

Text Books

Statistical Information Theory with Applications (17B1NMA533)

Course Description

Course Code	17B1NMA533	Semester Odd	Semester V Session 2024-25 Month from Aug 2024-Dec 2024
Course Name	Statistical Information Theory with Applications		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Prof. Amit Srivastava	
	Teacher(s) (Alphabetically)	Prof. Amit Srivastava	
COURSE OUTCOMES: After pursuing the above mentioned course, the students will be able to:			COGNITIVE LEVELS
C301-8.1	interpret the notions of entropy, relative entropy and mutual information in probabilistic and fuzzy frameworks.		Understanding Level(C2)
C301-8.2	apply the various measures of uncertainty and discrepancy in information distortion related problems.		Applying Level (C3)
C301-8.3	examine the importance of information theory in data compression problems.		Analyzing Level (C4)

C301-8.4	analyze problems related to encryption and decryption using information theoretic concepts.		Analyzing Level (C4)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Information Theoretic Measures	Review of Probability theory, Average information, Shannon and Renyi Entropy, Mutual information. Introduction to concepts of directed divergence, inaccuracy and information improvement	10
2.	Fuzzy Sets and Measures of Fuzzy Uncertainty.	Fuzzy Sets. Fuzzy Uncertainty and Fuzzy Information Measure, Similarity Measures, Fuzzy Measures of Directed Divergence, Total Ambiguity and Information Improvement, R-Norm Fuzzy Information Measure and its Generalizations.	10
3.	Source Coding	Data compression, Kraft-McMillan Equality and Compact Codes, Encoding of the source output, Shannon-Fano coding, Huffman coding, Lempel-Ziv (LZ) coding, Shannon-Fano-Elias Coding and Introduction to Arithmetic Coding. rate distortion theory, Lossy Source coding.	10
4.	Applications of information theory in Cryptography	Basic concepts of cryptography and secure data, Mathematical Overview and Shannon theory of Cryptography, perfect secrecy and the one time pad, Spurious Keys & Unicity Distance, Classical and Product Cryptosystems. semantic security and Stream ciphers, Characteristics for perfect security, Limitations of perfectly secure encryption, Block and Stream ciphers, Cipher Modes, Substitution Ciphers, Mono-alphabetic Substitution and Poly-alphabetic Substitution, Polygram, Transposition Ciphers, Rail Fence, Scytale, Book cipher, Vernam cipher, VigenereTabluae, Playfair, Hill Cipher, Cryptanalysis of Classical Cryptosystems,	12
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Quiz , Assignments, Tutorials, PBL)	
Total		100	
Project Based Learning: Each student in a group of 4-5 will apply the concepts of information theory in cryptography along with a detailed analysis of the proposed topic.			
Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)			

1.	Bose, R. , Information Theory Coding and Cryptography, 3 rd Ed, Tata McGraw-Hill, 2016.
2.	Jain, K. C., and Srivastava, A. , Information Theory & Coding, 3 rd Ed, Genius Publications, 2009
3.	Stallings, W. , Cryptography and Network Security Principles and Practices, Prentice Hall, 2003
4.	Cover, T.M. and Thomas, J. A. , Elements of Information Theory, 2nd Edition, Wiley, 2006.
5.	Haykin, S. , Communication Systems, John Willey & Sons, Inc, Newyork, 4th Ed, 2006
6.	Behrouz, A. F. , Introduction to Cryptography and Network Security, McGraw-Hill International Edition, 2008

Lecture-wise Breakup

Course Code	17B1NMA731	Semester Odd (specify Odd/Even)	Semester VII Session 2024 -2025 Month from Aug 2024-Dec. 2024
Course Name	Applied Linear Algebra		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Dr. Ram Surat Chauhan	
	Teacher(s) (Alphabetically)	Dr. Ram Surat Chauhan	
COURSE OUTCOMES : After pursuing the above mentioned course, the students will be able to:			COGNITIVE LEVELS
C401-7.1	Recall basic concepts of field, matrices and determinant, system of linear equations, quadratic forms, ordinary differential equations.		Remembering level (C1)
C401-7.2	Explain vector spaces, linear transformations, rank, orthogonality of matrices, eigenvalues, eigenvectors, inner product spaces, bilinear forms, norm of a matrix, condition number.		Understanding level (C2)
C401-7.3	Apply the concepts of eigenvalues, eigenvectors and their properties to solve a system of ordinary differential equations.		Applying Level (C3)
C401-7.4	Apply the concept of orthogonality and orthogonal matrices to orthogonalize a set of linearly independent vectors.		Applying Level (C3)
C401-7.5	Analyze the existence and uniqueness of solution of a system of linear equations and the diagonalizability of matrices and linear transformation.		Analyzing level (C4)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Vector Space and Dimension	Vector Space, Vector subspace, linear dependence and independence, Span of a set, Dimension of a vector space, Direct Sum and Complement	7
2.	Linear Transformation I	Linear Transformation and its algebra, and its matrix representation, homomorphism, isomorphism, rank and null subspace, rank-nullity theorem, Solution of a system of Linear Equations, Determinant	7
3.	Linear Transformation II	Change of basis, Inverse of a linear transformation, Linear functional, transpose	5
4.	Inner Product and Metric	Inner product space, Metric and normed spaces. Orthonormal basis, Orthogonal Subspaces, Gram-Schmidt orthogonalization.	8
5.	Eigen Values and Eigen Vectors	Eigen values and Eigenvectors, Modal matrix and diagonalization, Similarity Transformation, Eigen systems of real symmetric, orthogonal, Hermitian and unitary matrices	9

6.	Applications of Linear Algebra	Bilinear and Quadratic forms, Positive definite matrices, Norm of a matrix, Condition number, Application to find solutions of ordinary differential equations	6
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Assignments, Quizzes)	
Total		100	
Project Based Learning: Each student in a group of 4-5 students will apply the concepts of eigenvalues and eigenvectors to solve the ordinary differential equations arising in various real-life problems.			
Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)			
1.	Hoffman, K and Kunze, R. , Linear Algebra, Fourth Edition, Prentice Hall of India, 2005

3.	Noble, B. and Daniel, J. , Applied Linear Algebra, Prentice Hall of India, 2000		
4.	Lipshutz, S. and Lipsom, M. , Linear Algebra, 3 rd Edition, Schaum Series, 2001		
5.	Krishnamurthy, V., Mainra, V. P., and Arora, J. L. , An Introduction to Linear Algebra, Affiliated East-West, 1976		

Detailed Syllabus

Lecture-wise Breakup

Subject Code	19B12HS311	Semester: ODD	Semester V Session 2024-25 Month from July to December 2024
--------------	------------	---------------	--

Subject Name	ENTREPRENEURSHIP DEVELOPMENT		
Credits	3	Contact Hours	3(3-0-0)

Faculty (Names)	Coordinator(s)	Dr Deepak Verma
	Teacher(s) (Alphabetically)	Dr Deepak Verma

COURSE OUTCOMES:		COGNITIVE LEVELS
C303-8.1	Understand entrepreneurial fundamentals and considerations for developing a business idea	Understand Level (C2)
C303-8.2	Apply the entrepreneurial fundamentals to establish and develop business ventures and develop an entrepreneurial mindset	Apply Level (C3)
C303-8.3	Examine the importance of various critical business aspects such as marketing, finance and strategic planning in developing business	Analyze Level (C4)
C303-8.4	Assess strategies for resource hiring, Team management and leading a business venture	Evaluate Level (C5)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Entrepreneurial perspective	Foundation, Nature and development of entrepreneurship, importance of entrepreneurs, Entrepreneurial Mind, Individual entrepreneur Types of entrepreneurs, Entrepreneurship in India	8
2.	Beginning Considerations	Creativity and developing business ideas; Creating and starting the venture; Building a competitive advantage; Opportunity recognition, Opportunity assessment; Legal issues	14
3.	Developing Marketing Plans	Developing a powerful Marketing Plan, E-commerce, Integrated Marketing Communications	6
4.	Developing Financial Plans	Sources of Funds,	11

		Managing Cash Flow, Creating a successful Financial Plan Developing a business plan	
5.	Leading Considerations	Developing Team, inviting candidates to join team, Leadership model	3

4.	Sangeeta Sharma, "Entrepreneurship Development", 1 st Edition, Prentice-Hall India, 2016
5.	John Mullins, "The New Business Road Test: What entrepreneurs and investors should do before launching a lean start-up" 5th Edition, Pearson Education, 2017

Logical Reasoning and Inequalities (18B12MA312)

Course Description

Course Code	18B12MA312	Semester Odd	Semester V Session 2024-25 Month from Aug 2024- Dec 2024
Course Name	Logical Reasoning and Inequalities		
Credits	3	Contact Hours	3-0-0
Faculty (Names)	Coordinator(s)	Dr. Lakhveer Kaur	
	Teacher(s) (Alphabetically)	Dr. Lakhveer Kaur	
COURSE OUTCOMES			COGNITIVE LEVELS
After pursuing the above-mentioned course, the students will be able to:			
C301-9.1	Explain the concepts of mathematical inequalities, combinatorics, special numbers and logical reasoning.		Understanding (Level 2)
C301-9.2	apply the concepts of combinatorics and special numbers for solving various related problems.		Applying (Level 3)
C301-9.3	examine inequalities in the field of information theory and cryptography.		Analysing (Level 4)
C301-9.4	Analyse different problems using logical reasoning.		Analysing (Level 4)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module

1.	Inequalities	Basic Inequalities, Inequalities between means with special reference to AGM inequality, Jensen inequality for concave and convex functions, Hermite Hadamard inequality, Karamata's inequality, Popoviciu's inequality, Weighted AGM inequality and Young's inequality with applications in information theory, Bounds on Shannon entropy function and their generalizations, Perfect secrecy in cryptography.	12
2.	Basics of Counting	Pigeon Hole Principle, Binomial Theorem, Properties of binomial coefficients, combinatorial identities, Permutation of Multisets, Multinomial Theorem, Combinations of Multisets, Sterling's Formula, Generalization of Binomial coefficients, Inclusion exclusion principle.	12
3.	Special numbers	Catalan numbers, Partition numbers, difference sequences, Sterling Numbers, Perfect numbers.	10
4.	Logical Reasoning	Clocks, calendars, binary logic, seating arrangement, blood relations, logical sequence, assumption, premise, conclusion, linear and matrix arrangement, Syllogism, Binary Logic, Logical sequence & Matching, Mathematical Puzzles with applications.	8
Total number of Lectures			42

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25 (Quiz, Assignments, Tutorials, PBL)
Total	100

Project based learning: Each student in a group of 3-4 will apply the concepts of logical reasoning to solve related practical problems.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	Cerone, P. and Dragomir, S. S. , Mathematical Inequalities, CRC Press, Boca Raton, FL, 2011

4.	Kolman B., Busby R. C. and Ross S. , Discrete Mathematical Structures, Prentice Hall, 1996.
5.	Simmons, G. J. , The Great Book of Puzzles & Teasers, 1999.

19B13BT211: Environmental Studies

JAN-JUNE, 2024

Course Outline

Subject Code	19B13BT211	Semester: EVEN	Semester: V Session: 2024-2025 Month from: July to Dec
Subject Name	Environmental Studies		
Credits	0	Contact Hours	3 (1 Lecture, 2 interactive sessions)

Faculty (Names)	Coordinator(s)	1. Prof. Neeraj Wadhwa
	Teacher(s) (Alphabetically)	1. Dr. Aniruddh 2. Dr. Ekta Bhatt 3. Dr. Garima Mathur 4. Dr. Nivedita Mishra 5. Dr Pooja 6. Dr. Rajnish P Singh

COURSE OUTCOMES		COGNITIVE LEVELS
CO205.1	Explain diversity of environment, ecosystem resources, resource mismanagement and measures for conservation	Understanding Level (C2)
CO205.2	Identify hazards related to environmental pollution, associated laws, policies and safe practices	Applying Level (C3)
CO205.3	Apply modern techniques for sustainable planning to meet sustainable development goals (SDGs)	Applying Level (C3)
CO205.4	Survey regional environmental issues, examine risks involved and make a field report and present the findings	Analyzing Level (C4)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures
1.	Explain diversity of environment, ecosystem resources, resource mismanagement and measures for conservation	Definition, scope and importance, Need for public awareness, Types of Ecosystems, Biomes, Ecosystem functioning, Diversity of flora and fauna, Biodiversity hotspots, Threats to biodiversity, Water, Land, Energy Renewable & non-renewable resources, Case studies,.	8
2.	Identify hazards related to environmental pollution, associated laws, policies and safe practices	Air, Water & Land pollution, Electronic waste hazards, Global Conventions on Energy, Kyoto protocol, National Policy, laws and Acts such as: Environmental Protection Act, Air and Water Acts, Wildlife and Forest Acts, National Environmental Policy; Function of pollution control boards (SPCB and CPCB), their roles and responsibilities, Case studies.	14
3.	Apply modern techniques for sustainable planning to meet sustainable development goals (SDGs)	Study of sustainable measures, Critical issues concerning Global environment as Urbanization, population growth, global warming, climate change, acid rain, ozone depletion etc, Case studies.	8
4.	Survey regional environmental issues, examine risks involved and make a field report and present the findings	Technology and innovations, Disaster Management and Contingency Planning, impact of different types of disasters on human population, resettlement & rehabilitation, Case studies.	8
5.	Field Work	Explore the current environment related occurrences at national and international level, measure of water, air and land quality, Study of local polluted sites / ecosystems.	4
Total number of Lectures			42

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Chiras D D.(Ed.). 2001. Environmental Science – Creating a sustainable future. 6 th ed. Jones & Barlett Publishers.
2.	Joseph, B., 2005, Environmental Studies, Tata McGraw Hill, India
3.	Textbook of Environmental Studies for UG Courses - Erach Bharucha, University Press
4.	Issues of the Journal: Down to Earth, published by Centre for Science and Environment

EVALUATION:

Mid Semester Examination - 30 marks (To be held along with T-2 Exam)

End Semester Examination - 40 marks

Teachers Assessment (TA) - 30 marks

Structure of Grading Academic Performance: NP - Audit Pass, NF - Audit Fail

Note: During tutorials, there will be class discussions, class assignments, subject video display, spot tests/quiz (optional), tutorial work sheets.

Course Description

Subject Code	20B12CS332	Semester: Odd	Semester 5th Session 2024 -2025 Month from: July to Dec 2024
Subject Name	Fundamentals of Computer Security		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr. Amanpreet Kaur(62), Mr. Pankaj Mishra(128)
	Teacher(s) (Alphabetically)	Dr. Amanpreet Kaur, Dr. Pankaj Mishra, Dr. Sumeshwar Singh

COURSE OUTCOMES		COGNITIVE LEVELS
C330-2.1	Explain the fundamental concepts of computer security, malicious code and its effects	Understand Level (C2)
C330-2.2	Describe various authentication and access control paradigms	Understand Level (C2)
C330-2.3	Apply various preventive measures and techniques used to obtain secure system	Apply Level (C3)
C330-2.4	Examine various security parameters from the perspective of legal and ethical issues	Analyse Level (C4)

Module No.	Subtitle of the Module	Topics in the Module	No. of Lectures for the module
1.	Security Basics	General overview, terminology and definitions, Security policy issues, Security Models	6
2.	Introduction to Malware	Introduction to Malicious code, Spyware, Ransomware, Logic Bombs, Virus, Bacteria and Worms, Introduction to Anti-malware technology	6
3.	Threats to Network Communications and Basic Cryptography	Threats to Network Communications, Interception: Eavesdropping and Wiretapping, Modification, Fabrication: Data Corruption, Interruption: Loss of Service, Port Scanning, Introduction to cryptography and classical cryptosystem, Steganography vs Cryptography	8
4.	Authentication	Identification Versus Authentication, Authentication Based on Something You Know, Something You Are, Something You Have, Federated Identity Management, Multifactor Authentication, Secure Authentication, Password policies	5
5.	Access Control	Access Policies, Implementing Access Control, Procedure-Oriented Access Control, Role-Based Access Control, Captchas	5
6.	Intrusion Detection and Response	Goals for Intrusion Detection Systems, Types of IDSs – Anomaly Based and Signature Based	5
7.	Firewalls	What Is a Firewall?, Design of Firewalls, Types of Firewalls, Personal Firewalls, Comparison of Firewall Types, Example Firewall Configurations	3

8.	Legal and Ethical Issues	Protecting Programs and Data – Copyrights, Patents, Trade Secrets, Information and the Law – Information as an Object, Legal Issues Relating to Information, Protection for Computer Artifacts, Ethical Issues in Computer Security, Introduction to Cyber Crimes and Cyber Laws and IT Act 2000	4												
Total number of Lectures			42

<p>Reference Books:</p>	
1.	Computer Security Fundamentals, (4 th Edition), Chuck Easttum, Pearson Ed.
2.	Foundations of Computer Security, David Salomon, Springer
3.	Introduction to Modern Cryptography (2 nd edition), Katz and Lindell, Chapman & Hall/CRC
4.	Elements of Computer Security, David Salomon, Springer
5.	Cryptography Theory and Practice (3 rd edition), Stinson, Chapman & Hall/CRC

Detailed Syllabus

Lecture-wise Breakup

Course Code	20B12CS333	Semester: ODD	Semester: 5th Session:2024 -2025 Month from July 2024 - December 2024
Course Name	Introduction to Big Data and Data Analytics		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Ms. Sonal Saurabh (62), Dr.Neeraj Jain (128)
	Teacher(s) (Alphabetically)	Dr.Neeraj Jain, Ms. Sonal Saurabh

COURSE OUTCOMES		COGNITIVE LEVELS
C330-3.1	To demonstrate the fundamental concepts of growing field of big data analytics.	Understand (Level 2)
C330-3.2	To make use of tools required to manage and analyze big data like Hadoop, NoSql MapReduce.	Apply (Level 3)
C330-3.3	To apply predictive models and advanced computing paradigms for big data analytics.	Apply (Level 3)
C330-3.4	To analyze the big data using intelligent & visualization techniques.	Analyze (Level 4)
C330-3.5	To design and create predictive and mathematical model to solve complex real-world problems for decision making.	Create (Level 6)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction to Big Data	Introduction to Big Data landscape, Big Data: Why and where, Characteristics of Big Data- V's of Big Data (volume, velocity, variety, veracity, valence, and value) and Dimensions of Scalability, Data Models for Big Data Products (NOSQL, NEWSQL, HADOOP), Data Science and Analytics.	7
2.	Data Visualization Techniques	Introduction to Python or R, Understanding and Visualizing Data, Data Visualization R/Python.	5
3.	Data Modeling and Optimization	Modeling Uncertainty and Risk, Optimization and Modeling Simultaneous Decisions, Case Study.	5
4.	Decision Making and Predictive Analytics-1	Data exploration, Evaluation methods, Regression Techniques (Linear, Logistics, Multivariate), Classification Techniques (Decision Tree, ID3, Naïve Bayes), Case Study.	9
5.	Decision Making and Predictive Analytics-2	Clustering Techniques, Anomaly Detection, Dimensionality Reduction, Neural networks for deep learning, Hands-on using Python/R, Case Study.	9
6.	Big Data Technologies	Using Hadoop to store data (HDFS, HBASE), Process Data using MapReduce, Testing and Debugging MapReduce Applications.	7
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Internal assessment-05, Class Test/Quiz/Assignment-10, Mini-Project in PBL mode-10)	
Total		100	
Project based learning: The number of students in mini-project will be between 2-3. Students will use Python to design, develop, and implement big data applications or predictive models.			

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

Detailed Syllabus
Lecture-wise Breakup

Course Code	21B12HS312	Semester: Odd (specify Odd/Even)	Semester: 5 th Session: 2024 -2025 A month from: July-December
Course Name	Management Accounting		
Credits	03	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr. Purwa Srivastava
	Teacher(s) (Alphabetically)	Dr Purwa Srivastava

COURSE OUTCOMES	COGNITIVE LEVELS
-----------------	------------------

C303-10.1	Understand various aspects of the management accounting system including ethical conduct for accountants	Remembering (C1)
C303-10.2	Understand cost behaviour and apply cost-volume-profit analysis in decision making	Understanding (C2)
C303-10.3	Understand basic accounting concepts and analyze financial statements of a business organization	Applying (C3)
C303-10.4	Analyze various costing systems for cost allocation and pricing decisions	Analyzing (C4)
C303-10.5	Evaluate the master budget and carry out variance analysis for planning and management control decisions	Evaluating (C5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Basic Accounting concepts and financial statements	Accounting Concepts, principles, accounting equation, analysis of Balance sheet, Income statement, statement of changes in stockholders' equity, statement of cash flows. Common size statement, trend analysis and ratio analysis	7
2.	Management accounting system	Meaning of Management Accounting, Influences on accounting systems, Ethical conduct for accountants	7
3.	Cost Concepts and cost behaviour	Identifying resources, Activities, Costs and Cost drivers; Variable and Fixed cost behaviour; Cost-Volume-Profit Analysis	7
4.	Cost Management Systems	Direct, Indirect cost; Cost allocation; Traditional and Activity Based costing systems, special orders, pricing decision, cost-plus pricing, target costing, make or buy decision	7
5.	Budgetary Control	Introduction to budgets; Functional budgets, Master budgets, Fixed and flexible budgets, Budgets as financial planning models, Variance analysis	8
6.	Management control system	Organizational goal and performance measures, designing a management control system	6
Total number of Lectures			42
Evaluation Criteria Components		Maximum Marks	

T1	20
T2	20
End Semester Examination	35
TA	25 (assignments, class test, project)
Total	100

Project-based learning- The students will be given a group project to identify a simple business, one with at least two products, two services or one product & one service. They will estimate the fixed and variable costs related to the business and carry out a Cost-Volume-Profit analysis to determine the Break-even sales of the business. Also, they will determine the cost of products/services using Activity-based Costing. Lastly, the students will prepare a projected master budget for the next three years which includes the sales budget, operating expenses budget, cash budget, purchase budget, projected balance sheet, profit and loss account and so on.

Detailed Syllabus				
Subject Code	24B12HS314	Semester: ODD	Semester: V	Session: 2024-25 Month: July to Dec
Subject Name	Contemporary India: A Sociological Perspective			
Credits	3	Contact Hours	3-0-0	

Faculty Name	Course Coordinator (s)	Dr Yogita Naruka
	Teacher(s) (Alphabetically)	Dr Yogita Naruka

CO Code	Course Outcomes	Cognitive Levels
1	Students will be able to identify and understand the significance of key events and movements that changed the history of India's development experience.	Understanding, C2
2	Students will apply sociological perspectives to analyze and interpret contemporary issues and challenges facing Indian society.	Applying, C3
3	Students will critically analyze the impact of colonialism, independence, and liberalization on various aspects of Indian society, including culture, economy, politics, and social structure.	Analysing, C4
4	Students will be able to evaluate the processes that have resulted in the social and political changes in the contemporary India	Evaluating, C5

Module No.	Module Title	Topics	No. of lectures
1	Emergence of India as a Nation-State	Introduction to the course, idea of a nation-state, rise of India as a nation-state - Socio-political ramifications of Colonialism and Indian National Movement	8
2	Indian Sociological Perspectives -I	Indological Perspective (GS Ghurye), Structural Functionalist Perspective (MN Srinivas), Marxist Perspective (AR Desai)	9

3	Contemporary Changes in Indian Society	Changes in rural and urban society, impact of green revolution and liberalisation in transforming Indian Society	8
4	Indian Sociological Perspectives - II	Subaltern perspective, Feminist Perspective and Dalit Perspective	9
5	Concerns of contemporary Indian Society	Identity Politics, Gender Inequality, Social Conflict, Environment and Development	8
Total number of hours			42

Evaluation Criteria	
Components	Maximum Marks

Detailed Syllabus

Course Code	16B1NMA533	Semester - Odd (specify Odd/Even)	Semester 5th Session 2024 -2025 Month from Aug 2024 - Dec 2024
Course Name	Matrix Computations		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr. Amita Bhagat and Dr. Neha Singhal
	Teacher (s) (Alphabetically)	Dr. Amita Bhagat, Dr. Neha Singhal, Dr. Pato Kumari

COURSE OUTCOMES			COGNITIVE LEVELS
C301-3.1	recall the basics of matrix theory and system of linear equations.		Remembering Level(C1)
C301-3.2	explain matrix inversion by partitioning/elementary matrices, vector spaces, inner product spaces and matrix norms.		Understanding Level (C2)
C301-3.3	solve the system of linear equations and eigen value problems using direct and iterative methods.		Applying Level (C3)
C301-3.4	analyze systems of differential and difference equations arising in dynamical systems using matrix calculus		Analyzing Level (C4)
Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Matrix Algebra	Review of matrices, partitioning, block diagonal matrix, elementary matrices, Inverse of a matrix by partitioning.	6
2.	Linear System of equations	Existence and uniqueness of solution for system of linear equations. LU decomposition, Crout's and Doolittle's method, Cholesky factorization. Gauss Siedel, Gauss Jacobi and partial pivoting.	6
3.	Vector and Inner Product Spaces	Vector spaces, Subspaces, dimension and basis, p -norms of vector, Inner product, Norm using inner product and norms of a matrix.	6
5.	Orthogonality	Orthogonal and orthonormal sets, Gram-Schmidt process, QR factorization.	4
4.	Eigen value Problems	Eigen values and Eigenvectors, spectral radius, Greshgorin's theorem, Jacobi method, Givens rotations method and	12

		Householder's method, Power and Inverse power methods, Q-R algorithm.	
6.	Matrix Calculus	Powers and functions of matrices, application to solve discrete dynamical systems $x(t+1) = Ax(t)$, $x(0) = \alpha$ and a system of differential equations of the form $dx/dt = Ax$, $x(0) = \alpha$.	8
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks

Lecture-wise Breakup

Course Code	15B11CI313	Semester ODD (specify Odd/Even)	Semester Fifth Session 2024-2025 Month from July –Dec 2024
Course Name	Computer Organization and Architecture		
Credits	4 (L=3, T=1)	Contact Hours	3-1-0

Faculty (Names)	Coordinator(s)	Dr. Hema N. (Sec. 62), Dr. Rashmi Kushwah (Sec.128)
	Teacher(s) (Alphabetically)	Amarjeet Kaur, Hema N., Jyoti Chauhan, Pankaj Mishra, Pawan Kumar Upadhyay, Prakhar Mishra, , Rashmi Kushwah, Sayani, Shailesh Kumar, Taj Alam

COURSE OUTCOMES		COGNITIVE LEVELS
C317.1	Summarize and Classify the different computer systems based on RISC and CISC Architecture.	(Understand)Level 2
C317.2	Apply the knowledge of performance metrics to find the performance of systems.	(Apply) Level 3
C317.3	Examining various types of computers based on Instruction Set Architectures.	(Apply)Level 3
C317.4	Analyze RISC and CISC based system designs for Hardwired and Microprogrammed Controller.	(Analyze) Level 4
C317.5	Apply the knowledge of pipeline, IO and cache to understand these systems. Further, analyze the performance of such systems.	(Analyze) Level 4
C317.6	Create and analyze an assembly language program of RISC and CISC-based systems.	(Evaluate) Level 5

Module No.	Title of the Module	Topics in the Module	No. of Lectures for module
1.	Introduction	Levels in architecture, Virtual machine, Evolution of multi-level machines.	2
2.	Performance of Computer	Introduction, Performance Measures For Computer System using MIPS, Clock Rate, No. of Instruction and Amdahl's Law. Numerical Related to performance measures for different specification.	4
3.	CPU Organization	Basic Computer Organization, Instruction Representation basics, Data-path and control, Instruction	4

		execution, Microinstruction.	
4.	Data Path and Control	Introduction,Architecture of JC62, Instruction Set,Hardwired designing for JC62. Micro-programmed control designing for JC62.	4
5.	Generalized Study of Instruction Set Architecture	Stack/accumulator/register-register/register-memory type of architecture. Memory addressing techniques.	2
6.	Types of Instruction	Data movement, Arithmetic/logic, Control flow, Addressing modes. Instruction format.	2
7.	Instruction Set Architecture (ISA) of 8085	8085 Architecture, 8085 Instruction Set, 8085 Instruction Format, 8085 Addressing Modes, 8085 instruction execution and datapath. 8085 Assembly programming for simple applications.	5
8.	ISA of MIPS	MIPS Architecture, MIPS Instruction Set, MIPS Instruction Format, MIPS Addressing Modes, MIPS instruction execution and datapath. MIPS Assembly programming for simple applications.	5
9.	Memory Organization	Hierarchal memory structure, Cache memory and organization, Cache Mapping,Cache Replacement algorithms,Memory interfacing for 8085.	5
10.	I/O Organization	IO instruction format, IO Mapping, Programmed/Interrupt driven I/O, DMA controllers	3
11.	Pipelining	Introduction To Pipelining System, Pipelining in RISC based Systems (MIPS), Pipeline Hazards and its solutions.	5
12.	Multicore Architecture	Generalized study of Multicore Machines.	1

Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (Attendance/Sincerity =10, Internal assessment/ Class Test or/and Quizzes =08, Mini-Project = 7).	
Total		100	

Project-based learning: In this subject, students will learn the Organization and Architecture of the different computer systems. After completing the subject, students can measure the performance of different computer systems. They can create low bit assembler applications. Along with this, they will be able to interface memory with different architectures like 8085and MIPS.

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Textbooks, Reference Books, Journals, Reports, Websites etc., in the IEEE format)
Text Books

1.	M. Morris Mano, Computer System Architecture, Prentice Hall of India Pvt Ltd, 3 rd Edition (updated), 30 June 2017.
2.	William Stallings, Computer Organization and Architecture–Designing for Performance, Ninth Edition, Pearson Education, 2013.
3.	John L. Hennessy and David A Patterson, Computer Architecture A Quantitative Approach, Morgan Kaufmann / Elsevier, Sixth Edition, 23rd November 2017
4.	Ramesh Gaonkar, Microprocessor Architecture Programming and Applications with the 8085, Prentice Hall, Eight Edition, 2013.
Reference Books	
1.	Nicholas Carter, Schaum’s outline of Computer Architecture, Tata McGraw Hill, Second Edition, 2014.

Detailed Syllabus
Lecture-wise Breakup

Course Code	22B1NPH311	Semester: Odd	Semester: 5 th Session: 2024-2025 From: July to December
Course Name	Engineering Materials and Technology		
Credits	3	Contact Hours	3

Faculty (Names)	Coordinator(s)	Dr. R.K. Gopal
	Teacher(s) (Alphabetically)	Dr. R.K. Gopal

COURSE OUTCOMES		COGNITIVE LEVELS
After completion of the course, students will be able to:		
CO1	Recall the importance of engineering materials existing in the environment around us.	Remember Level (Level 1) (C1)
CO2	Explain and compare the different properties of the materials along with their broad classifications.	Understand Level (Level 2) (C2)
CO3	Apply the knowledge to analyze and use the different processes of the materials manufacturing.	Apply Level (Level 3) (C3)

CO4	Apply the knowledge to develop/ choose materials for advanced engineering applications including robotic, drone and aerospace.	Analyze Level (Level 4) (C4)
------------	--	------------------------------

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction to Materials	Broad categorization of materials, Structure, property and performance relationship in materials. Engineering Materials Development in India.	4
2.	Material Properties	Review of material properties. Fracture, fatigue, diffusion and creep. Failure of materials. Material Deformations. Durability, oxidation, corrosion and degradation. Basics of Phase Diagrams and Diffusion.	8
3.	Ceramics and Metals	Metals and Alloys. Strengthening and degradation, corrosion prevention. Material Strengthening. Sub-classification, processing and properties of traditional and advanced ceramics. Phase diagrams using CALPHAD approach for ceramics and metals.	8
4.	Polymers and Wood	Introduction and classification, polymeric structure, effects of glass transition temperature, polymer mechanical properties. Classification and facets of wood.	3
5	Material Composites	Composites: polymer matrix, metal matrix, ceramic matrix, carbon-carbon. Longitudinal and transverse modulus. Composite making methods.	6
6.	Processing and Selection of Material	Manufacturing Processes and Design, Instruments and Furnaces. Materials, Environment and Sustainability. Automation in Materials Processing, Laser ablation of materials in additive manufacturing.	7
7	Development	Exploring materials development using computer software tools. Python packages and machine learning algorithm. Material Analysis using PyMKS	4
Total number of Lectures			40

Evaluation Criteria	
Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25
Total	100

Recommended Reading material:	
1.	Callister, W. D., Material Science and Engineering: An Introduction, Wiley publication, 2014
2.	Ashby, Michael F. & Jones, David, Engineering materials, Elsevier publication, 2018
3.	Ashby, Michael F., Materials selection in mechanical design, Elsevier publication, 2019
4.	Jones, Robert M., Mechanics of composite materials, Taylor & Francis publication, 2015
5.	Chopra, Inderjit & Sirohi, Jayant, Smart structures theory, Cambridge press, 2013
6.	Raghavan, V., Materials Science and Engineering, Prentice Hall of India, 2004
7.	Bolton, W., Engineering Materials Technology, Elsevier, 2013, 1993

Project Based learning: Different groups of students with 3-4 students in each group may be formed and these groups may be given to complete a task like collecting and classifying the materials for different applications. Students may be given a task of preparing data on current and futuristic materials and processes. Students can explore and interact with different industry and come out with their understanding and interpretation. They can use different commercially available software tools to do designing and prediction. Within each of these problem domains, the students will learn to work in a team. It will improve their analytical skills and the students will learn to achieve their common goal through mutual discussion and sharing of knowledge, information & understanding.
